12.02.2024	2.11.4	2.6.3	New	<ul style="list-style-type: none"> - Contact Lenses, Contact Lens Tints, Other Items, Solutions, Spectacle Frames, Spectacle Lenses, Spectacle Lens Addons, Spectacle Lens Tints and Sunglasses BRANCH_INFO.MEMBER_SELLINC in GET - Contact Lenses, Contact Lens Tints, Other Items, Solutions, Spectacle Lenses, Spectacle Lens Addons and Spectacle Lens Tints BRANCH_INFO.INACTIVE - Contact Lens Tints, Spectacle Lens Addons and Spectacle Lens Tints BRANCH_INFO.FAVOURITE
09.01.2024	2.11.3	2.6.3	New	<ul style="list-style-type: none"> - Spectacle Lens Orders OWN_FRAME in GET
15.11.2023	2.11.2	2.6.3	New	<ul style="list-style-type: none"> - Appointments Optometrists' Availability - Spectacle Lens Rx PATCH - Spectacle Lens Orders RIGHT_FITTING_HEIGHT and LEFT_FITTING_HEIGHT in GET - Spectacle Lens Orders RIGHT_FITTING_HEIGHT, LEFT_FITTING_HEIGHT, LEFT_SEGHEIGHT, RIGHT_SEGHEIGHT, LEFT_BVD, RIGHT_BVD, LEFT_PANTO, RIGHT_PANTO, LEFT_PD, RIGHT_PD, LEFT_NEARPD, RIGHT_NEARPD and WRAP in PATCH - Patients LAST_KEEPSIGHT_SENT_DATE in GET
			Updates	<ul style="list-style-type: none"> - Config files content, Appendices D and E
12.09.2023	2.11.1	2.6.0	Fixes	<ul style="list-style-type: none"> - Spectacle Lens Order was removing the existing PRACTICE_COMMENTS when no value was supplied on PATCH

Updates

- Add Spectacle Lens Order WHEN_READY_TEXT for PATCH

15.08.2023 2.11.0 2.6.0

New

- Inventory Movements resource

Updates

- Sunglasses, Spectacle Lenses, Spectacle Frames, Other Items, Contact Lenses and Solutions will log QOH changes for items marked as INVENTORY to be displayed by the Inventory Movements resource

30.03.2023 2.10.1 2.5.0

New

- Appointments FINALISED_APPOINTMENT_DATETIME in GET
- Spectacle Lenses WINLINUX_CODE, WINLINUX_ADD_CODE, OPTILINKCODE, OPTILINKGROUP, WINFITCODE, RXOFFICECODE, HOYACODE, HOYATINT, HOYACOAT, SHAMIRCODE, SWISSCOAT_LENSCODE, SWISSCOAT_TINTCODE, SWISSCOAT_COAT1CODE, SWISSCOAT_COAT2CODE, VISUSTORE_COMMERCIAL_CODE, CR_SURFACING_PRODUCTCODE, CR_SURFACING_TINTCODE, CR_SURFACING_COAT1CODE, CR_SURFACING_COAT2CODE
- Spectacle Lens Add-Ons VISUSTORE_COMMERCIAL_CODE, VISUSTORE_COATING_TYPE, WINLINUX_CODE, CR_SURFACING_PRODUCTCODE
- Spectacle Lens Tints VISUSTORE_COMMERCIAL_CODE, WINLINUX_CODE, CR_SURFACING_PRODUCTCODE
- Static Reference Code Optilink Lens Groups

Update

- Remove Spectacle Lenses EYETALK_PERMID and EYETALK_BOOKCODE
- Remove Spectacle Lens Add-Ons EYETALK_PERMID and EYETALK_BOOKCODE

14.02.2023 2.10.0 2.5.0

New

- Users resource
- StaticReferenceId User Types

05.12.2022 2.9.1 2.3.4

Update

- Purchase Order IDENTIFIER is now optional in POST, to be defaulted to generated ID

31.10.2022 2.9.0 2.3.4

New

- SMS Transactions resource
- Static Reference Id SMS Types
- Patient Invoice ITEMS COSTEX and COSTINC in GET

30.09.2022 2.8.1 2.3.1

New

- Examination Details DIABETES_VALUE, DIABETES_TYPE_VALUE, GLAUCOMA_VALUE, GLAUCOMA_TYPE_VALUE, AMD_VALUE, AMD_TYPE_VALUE, DRY_EYE_VALUE, DRY_EYE_TYPE_VALUE, DILATED_FUNDUS_INFORMED_CONSENT_VALUE, TOPOGRAPHY_PERFORMED_VALUE, PERIMETRY_PERFORMED_VALUE, OCT_PERFORMED_VALUE

Update

- Remove Examination Details DILATED_FUNDUS_INFORMED_CONSENT, TOPOGRAPHY_PERFORMED, PERIMETRY_PERFORMED, OCT_PERFORMED

12.09.2022 2.8.0 2.3.0

New

- Patient Notes resource

18.08.2022 2.7.15 2.0.5

Fixes

				<ul style="list-style-type: none"> - Resolve issue with authenticating Contact Lens Orders PATCH requests
			Update	<ul style="list-style-type: none"> - Add Spectacle and Contact Lens Orders PRACTICE_COMMENTS for PATCH
10.06.2022	2.7.14	2.0.5	New	<ul style="list-style-type: none"> - Patient Recalls BRANCH_IDENTIFIER in GET
			Update	<ul style="list-style-type: none"> - Allow up to 12 characters on Patient MOBILE_PHONE - Make Appointment APPOINTMENT_TYPE a required value

27.08.2019	1.0.6		New <ul style="list-style-type: none"> - Added Patient HEARAID_GUID
14.08.2019	1.0.5		New <ul style="list-style-type: none"> - Patient Invoices resource - Invoice Types reference data Updates <ul style="list-style-type: none"> - Renamed Purchase Order ORDER_ID to SPECTACLE_LENS_ORDER_ID
12.08.2019	1.0.4		New <ul style="list-style-type: none"> - An API User Password can be set in Optomate Touch - IIS Hosted version of the API that can be configured to run over HTTPS - Patient Recalls resource
24.05.2019	1.0.0		New <ul style="list-style-type: none"> - API for Optomate Touch

OVERVIEW

The Optomate Touch API is a RESTful service that is intended to run locally on a network where Optomate Touch is installed. It supports OData queries and exposes a limited set of Optomate Touch resources for external application integration by the use of http method calls. This document describes these resources in terms of their functionality, URIs and the method calls that can be performed on them. It also describes the format of the request and receive data for each method call and any associated input data validation.

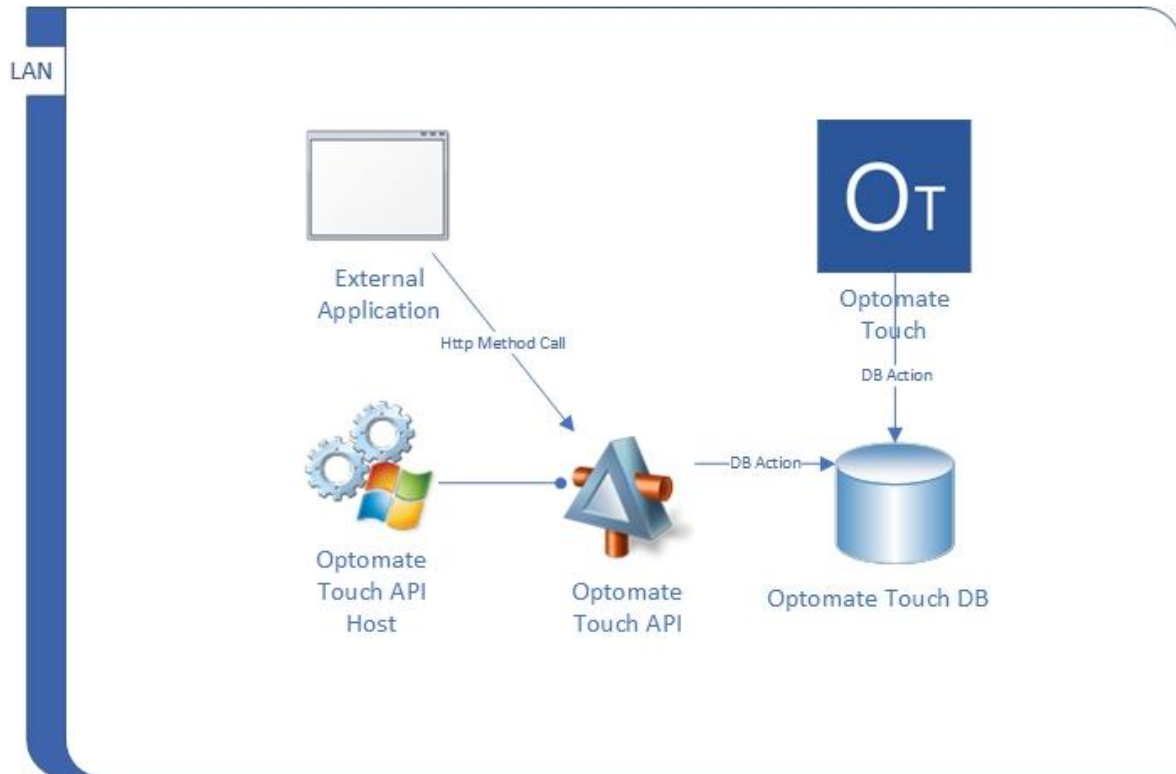

Where appropriate, the API replicates validation and defaulting logic as implemented in Optomate Touch.

The API can be installed with two different hosting models:

- Self-hosted: the API is hosted in a Windows Service and runs over HTTP. This provides for a quick install that does not require a configuration of additional resources and is suitable for development and local integrations.
- IIS hosted: the API is hosted in IIS as a 64-bit Web Application and can be configured to run over HTTP and/or HTTPS. This provides for a greater control over the API and increased security when configured to run over HTTPS.

SELF-HOSTED MODEL

The Optomate Touch API is hosted by a Windows Service that is installed as an add-on to the Optomate Touch application. The API connects to the Optomate Touch DB using the OptomateApiService user.

DETAILS

Host Type	Windows Service
Name	Optomate Touch API Host
Description	Hosts the Optomate Touch API
MSI Package	OptomateTouchAPI-n.n.n-Hosted.msi

By default, the API Host Service will run under the Local System account, however this can be changed after installation to another preferred account that has network access.

INSTALLATION STEPS

STEP 1

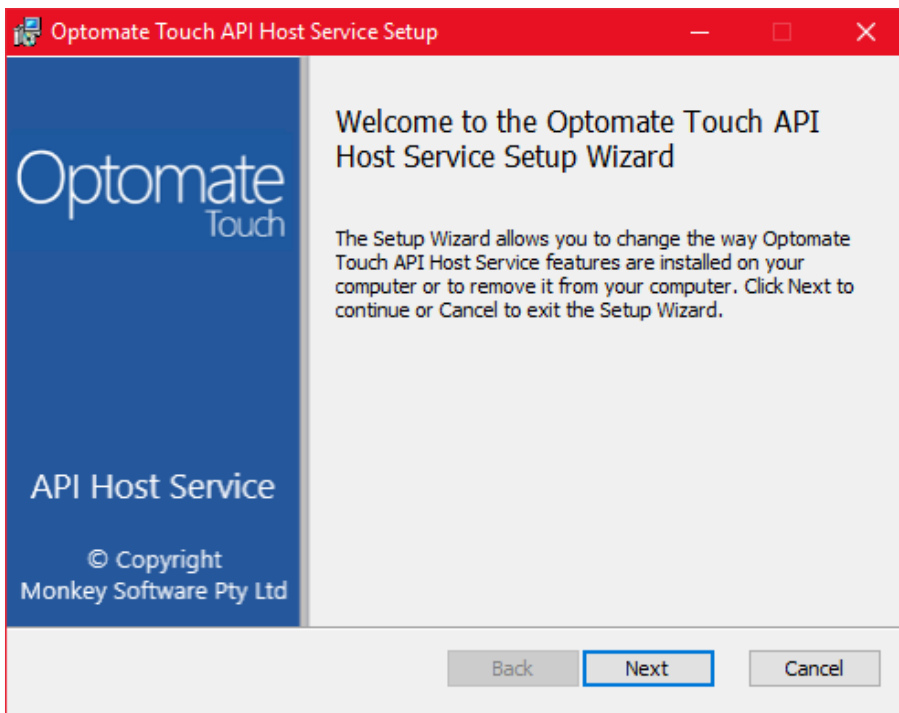

Execute the MSI package on the server where the Optomate Touch application is installed.

The person executing the MSI package needs to have admin privileges in order to be able to install the host service.

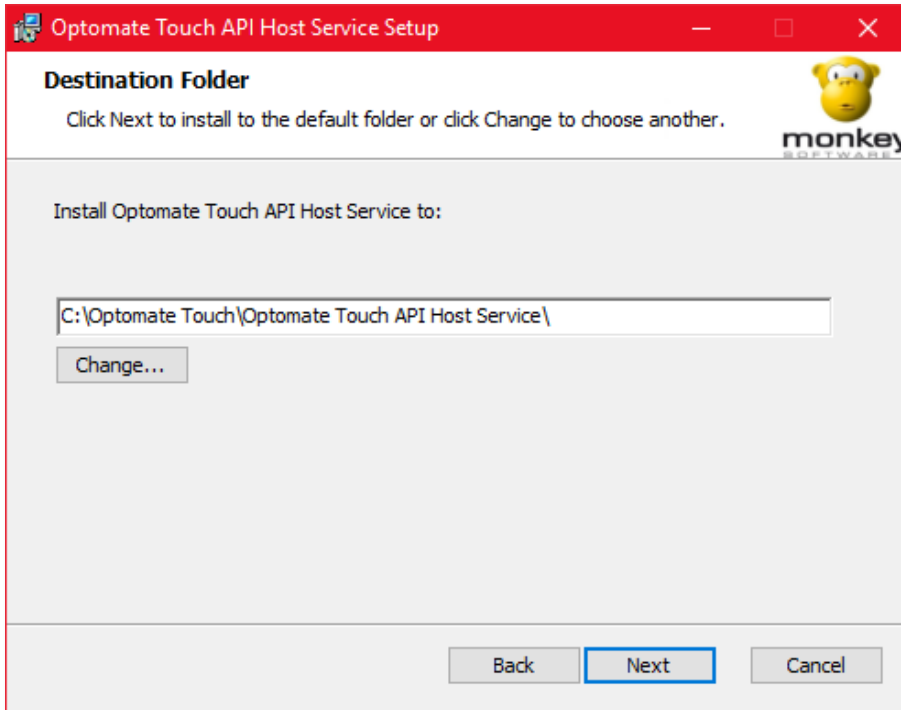

STEP 2

Click  on the Welcome Window.

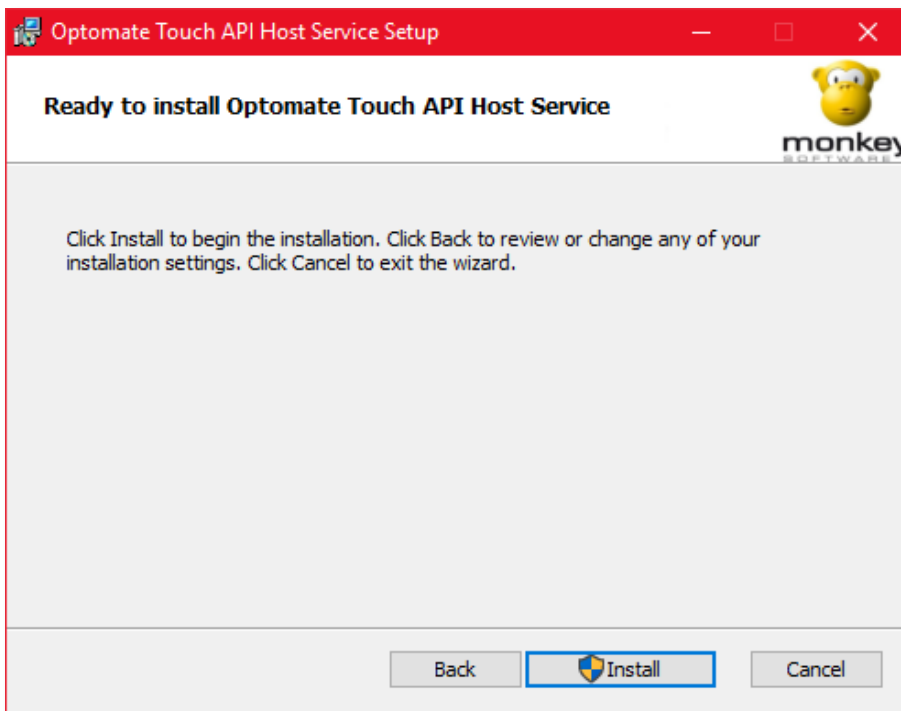

STEP 3

Click  on the Destination Folder Window.

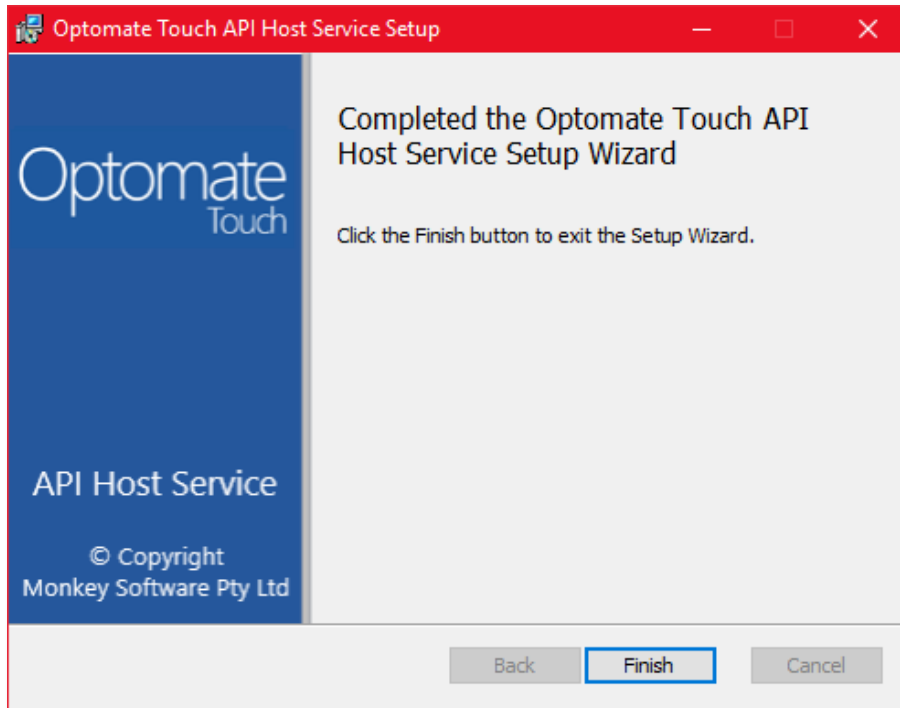

STEP 4

Click  to install the Host Service.

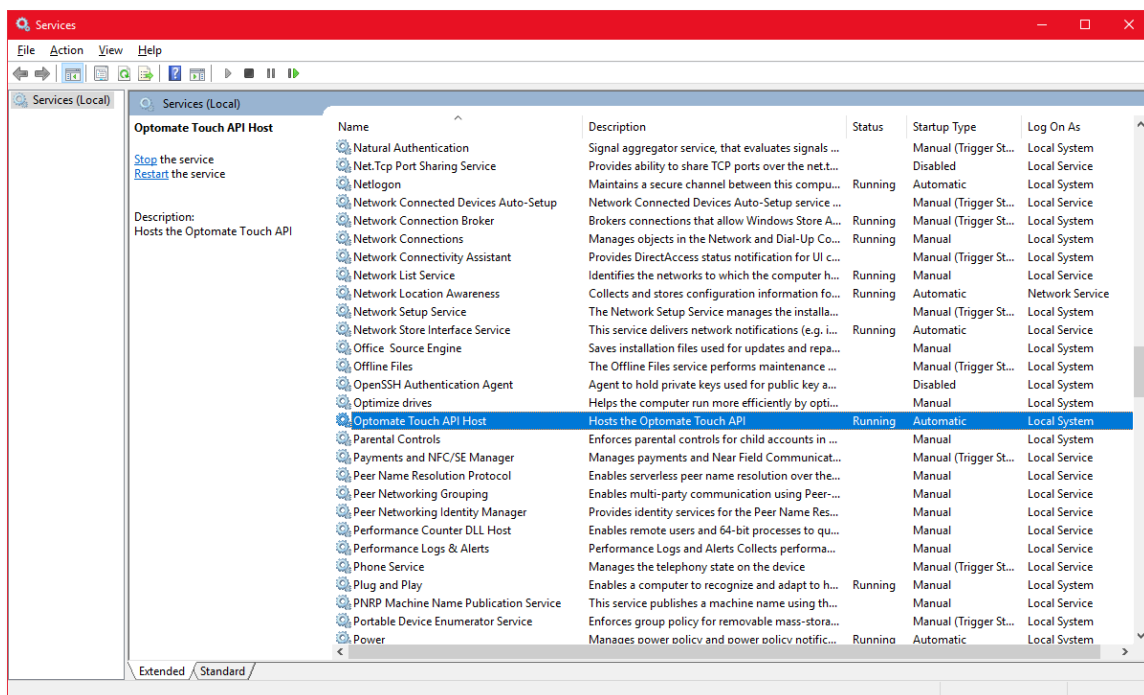

STEP 5

Click **Finish** to complete the installation.

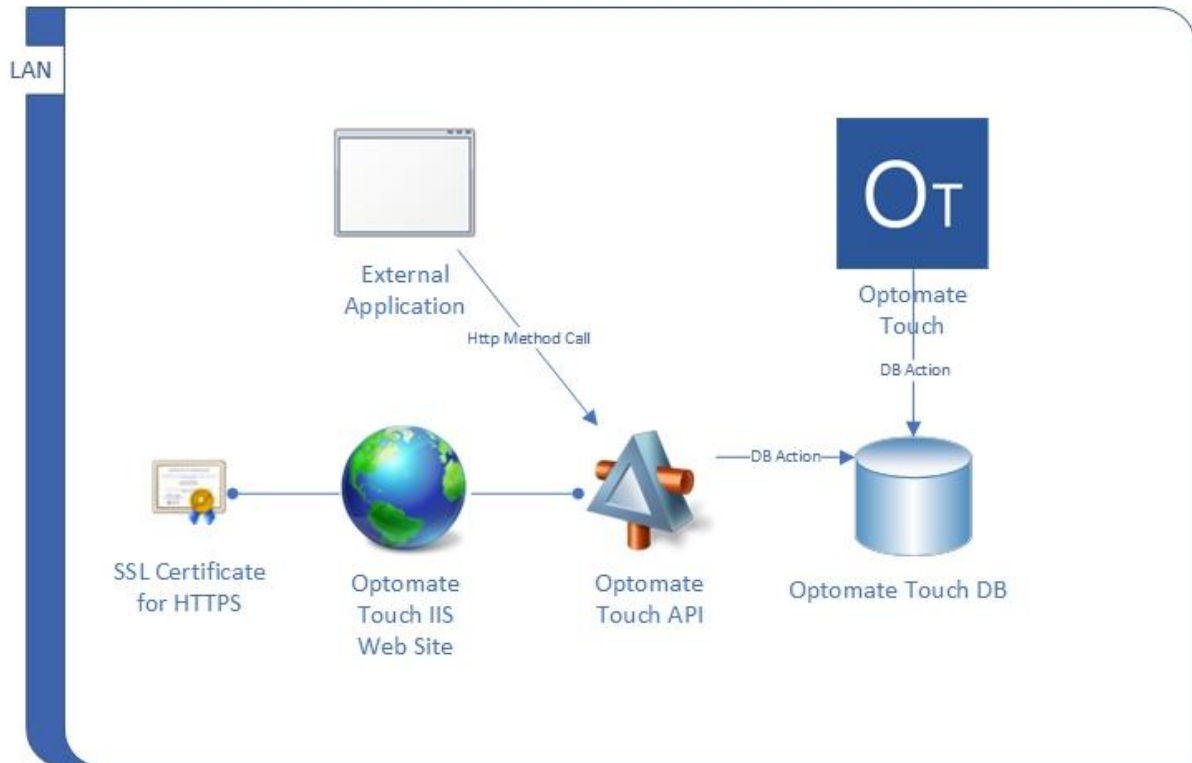

STEP 6

Verify that the service is up and running by checking the Services Management Console.

IIS HOSTED MODEL

The Optomate Touch API is hosted in IIS as a 64-bit Web Application that is installed as an add-on to the Optomate Touch application. The API connects to the Optomate Touch DB using the OptomateApiService user.

DETAILS

Host Type	IIS x64
Name	Optomate Touch API
Description	Optomate Touch API Web Site
MSI Package	OptomateTouchAPI-n.n.n-x64.msi

Once created in IIS the Optomate Touch API web site would need to be configured in order for the API to function correctly. Please refer to the Configuration section for information.

INSTALLATION STEPS

STEP 1

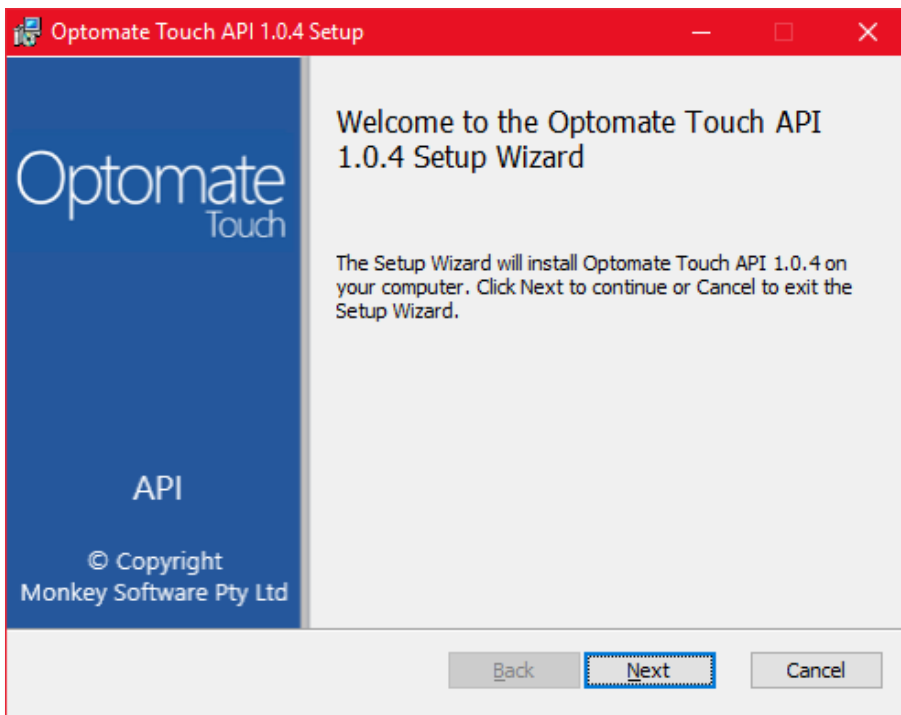

Execute the MSI package on the server where the Optomate Touch application is installed.

The person executing the MSI package needs to have admin privileges in order to be able to create the IIS application.

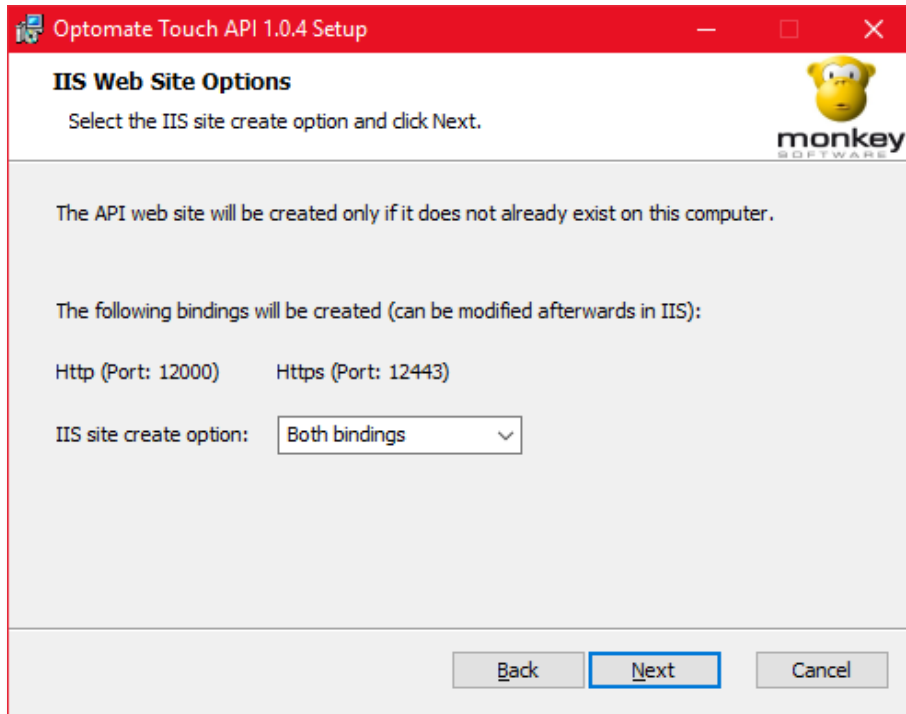

STEP 2

Click  on the Welcome Window.

STEP 3

Select the IIS site create option and/or click on the IIS Web Site Options Window.

IIS site create options:

- Do not create: Only install Optomate Touch API but do not host in IIS
- Http binding only: Create API web site in IIS with only Http type binding (Port :12000)
- Https binding only: Create API web site in IIS with only Https type binding (Port :12443)
- Both bindings: The API web site will be created in IIS with both Http and Https type bindings

If installing the API, the installer will attempt to create an IIS Web Site provided the following conditions are met:

- IIS is configured on the computer where the API is being installed
- The user installing the API has admin privileges
- The API web site does not already exist in IIS

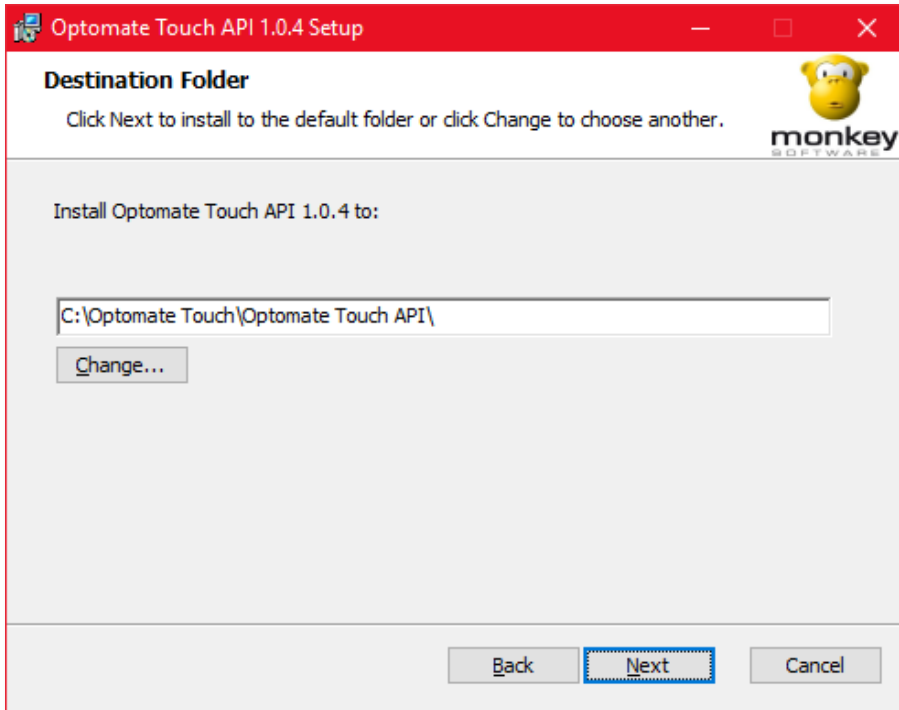

Once created in IIS, the Optomate Touch API Web Site can be configured via the IIS Manager.

If creating an “https” type binding, an SSL certificate would need to be selected for the binding after the installation is completed, please see the Configuration section for more details.

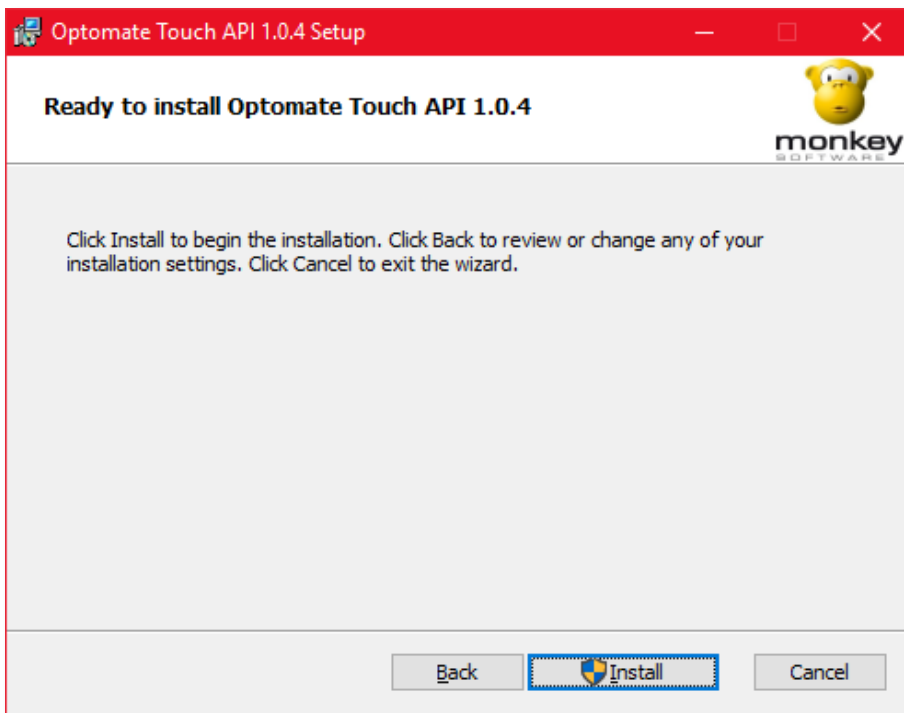

STEP 4

Click  on the Destination Folder Window.

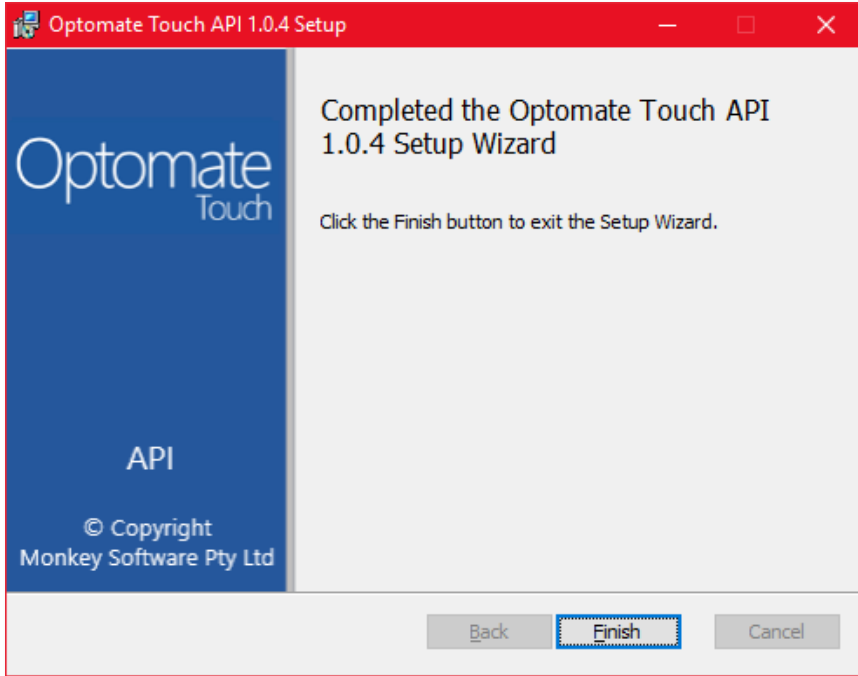

STEP 5

Click  to install the API.

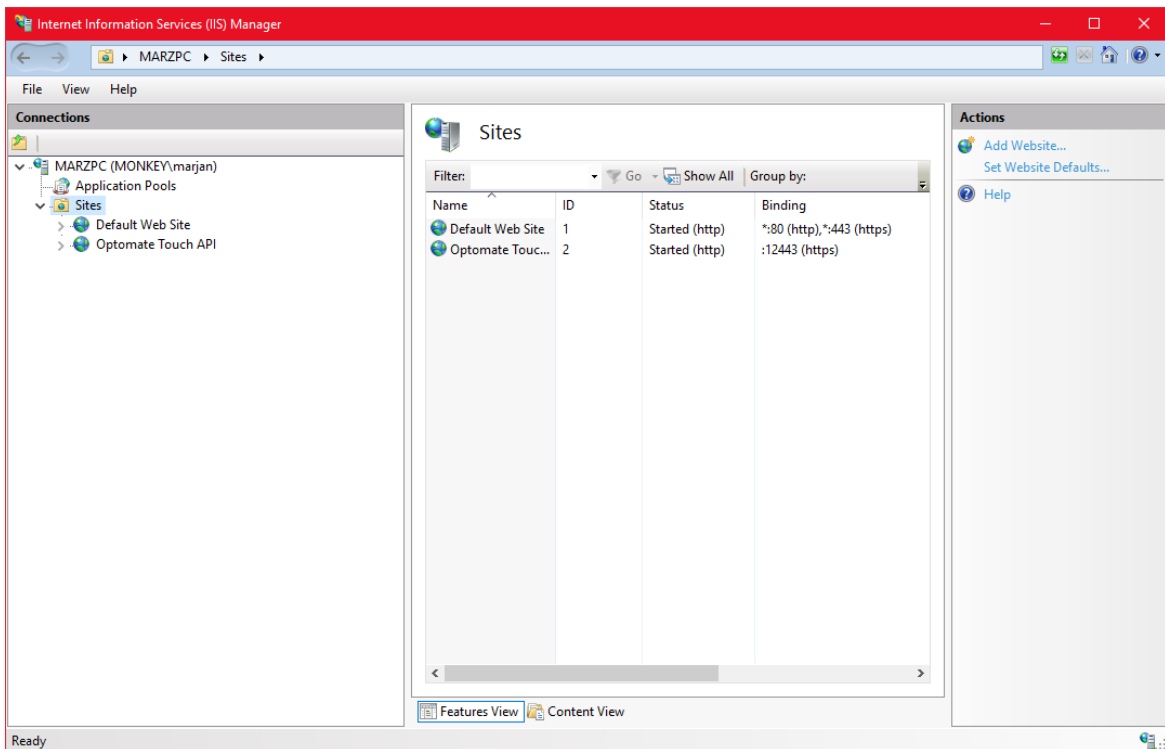

STEP 6

Click  to complete the installation.

STEP 7

If a Site Binding was configured, verify that the web site is up and running by checking the IIS Manager Console.

CONFIGURATION

The API configuration file can be found in the API installation folder.

- Self-Hosted: OptomateTouchWebApiWinService.exe.config
- IIS Hosted: Web.config

Check Appendices for the current content of the configuration files.

If the API is hosted in IIS the config file and all other settings can be modified via IIS Manager.

Making incorrect changes to the configuration may cause the API to stop behaving as intended or completely stop functioning.

Once installed the following would need to be configured:

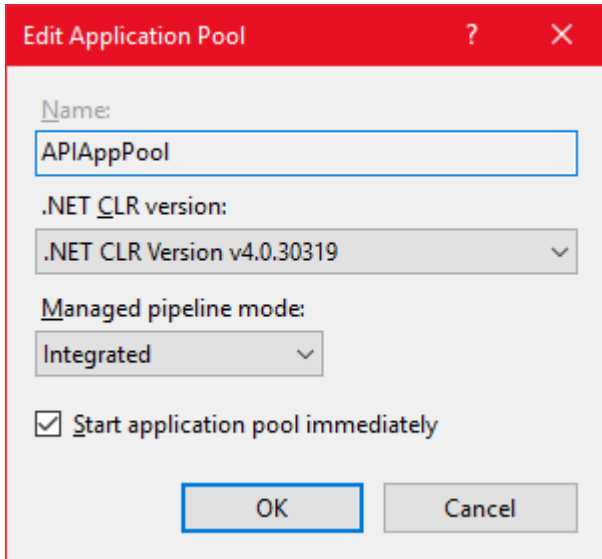

HOST (SELF-HOSTED ONLY)

The configured Host for the API is `http://localhost:12000` however this can be changed if required by changing the value of the **api:Host** key in the `appSettings` section:

```
<appSettings>  
  <add key="api:Host" value="http://localhost:12000"/>  
</appSettings>
```

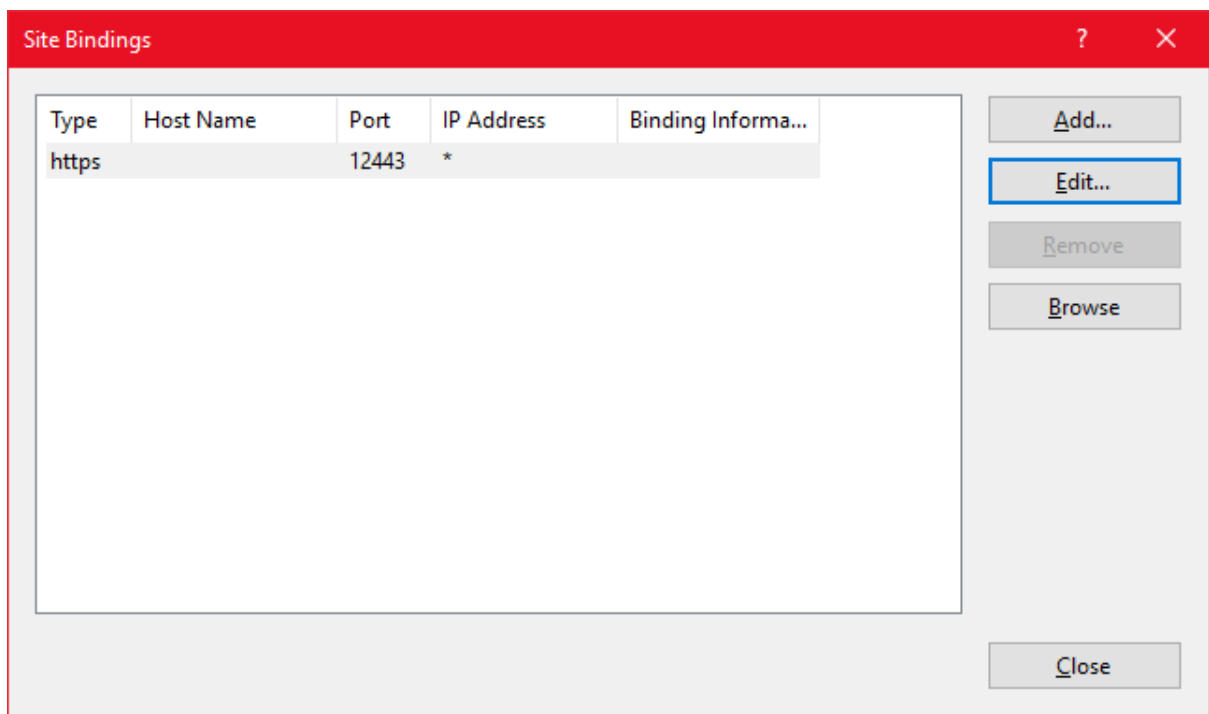

APPLICATION POOL (IIS HOSTED ONLY)

By default, the Optomate Touch API web site will be configured with the default application pool. The web site would need to be configured with an application pool running under an account that has network access and read & execute permissions to the directory where the API is installed. The application pool needs to be configured with the following settings (the Name is just a suggestion):

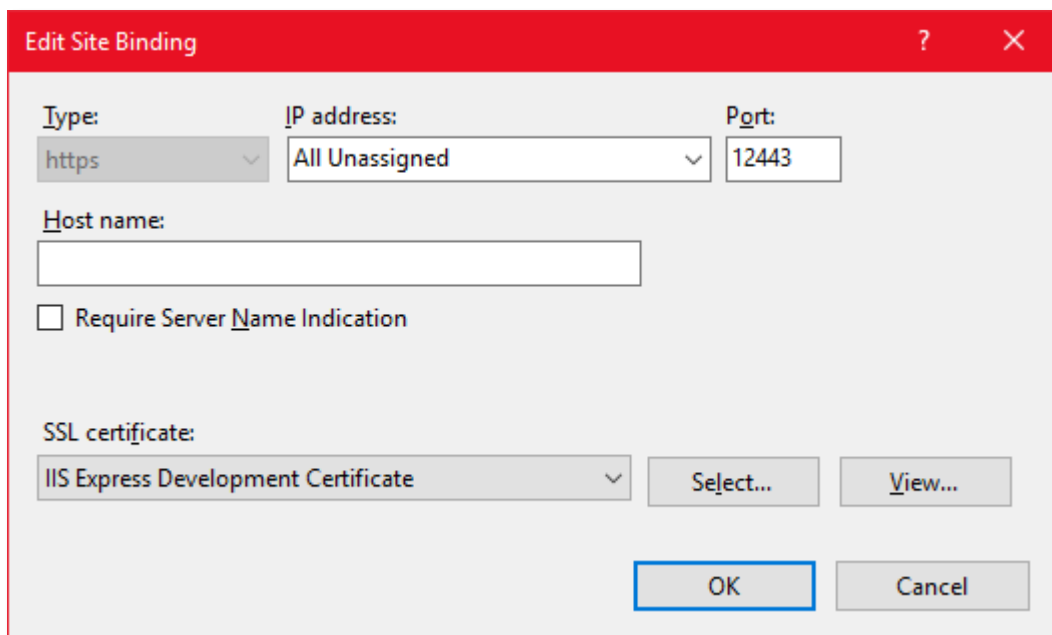

SITE BINDINGS (IIS HOSTED ONLY)

If the Optomate Touch API web site is intended to be run over HTTPS, then a site binding of type Https would need to exist for the site. If one was not created during the installation process it can be added in IIS at a later stage:

An Https type binding needs to have an SSL Certificate* assigned to it, which can be done by editing the binding:

(*) – Needs to be a valid SSL Certificate issued by a Certificate Authority (CA)

DB CONNECTION

If the Optomate Touch Database resides on a different host, or the SQL Server Database is a named instance, then the API configuration would need to be updated accordingly.

The Optomate Touch Database connection **OptomateTouchEntities** is configured in the connectionSettings section:

```
<connectionStrings>
  <add name="OptomateTouchEntities"
    connectionString="metadata=res://*/Models.OptomateTouchModel.csdl|res://*/Models.OptomateTouchModel.ssdl|res://*/Models.OptomateTouchModel.msl;provider=System.Data.SqlClient;provider connection string=&quot;data
    source=localhost;initial catalog=Optomate;persist security info=True;user
    id=OptomateApiService;password=*****;MultipleActiveResultSets=True;App=EntityFramework&quot;;
    providerName="System.Data.EntityClient" />
</connectionStrings>
```

The localhost in the highlighted part can be updated with the Hostname of the SQL Server. If the SQL Server was installed as a Named Instance, then the Hostname\Instance combination needs to be used in the data source string.

If a different DB account is to be used to the default OptomateApiService user, then the user id and password values in the connection string would need to be updated accordingly.

EXECUTION TIMEOUT

An execution timeout setting can be optionally configured that will instruct the API to wait for a certain period (in seconds) for the execution of the SQL Server queries. When not specified, the default value of SQL Server will be used.

```
<appSettings>
  <add key="ExecutionTimeout" value="30" />
</appSettings>
```

UNINSTALLING

When uninstalling the Optomate Touch API from a computer, the installer may fail to remove a configured Optomate Touch API web site from IIS. In this case the web site should be manually removed from IIS.

SECURITY

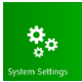

Every request sent to the API will need to contain an **Authorization** header with the API user **Username** and **Password** that is configured and enabled in Optomate Touch

AUTHENTICATION

In order to use the Optomate Touch API an API user would need to be configured in Optomate Touch and enabled. Each API call is secured with Basic Authentication requiring the credentials of an enabled API user.

An API user can be configured in Optomate Touch System Settings which can be accessed by clicking

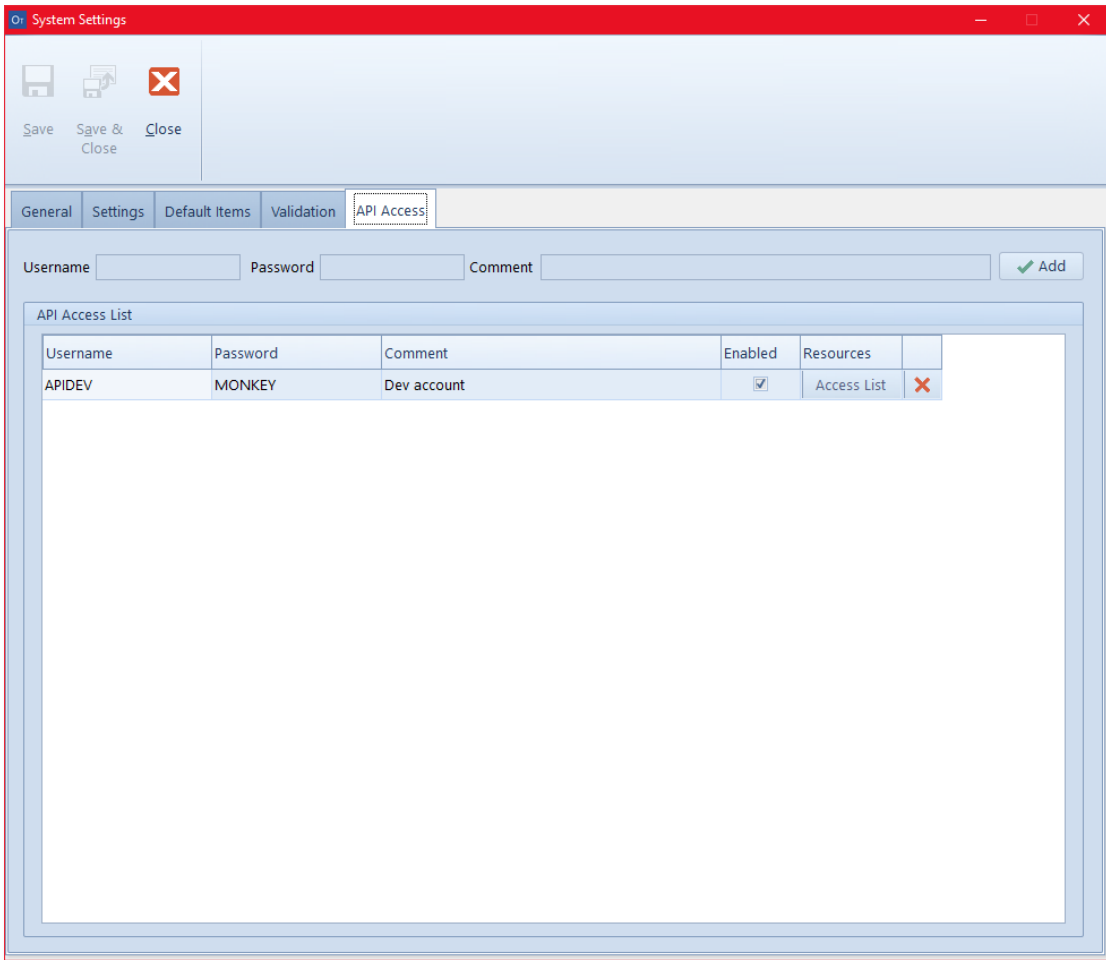

on  in the Setup tile group on the Optomate Touch home screen.

In the System Settings window go to the API Access tab to configure an API user. Enter the following:

- Username: name of the API user (min 4 characters)
- Password: password for the API user
- Comment: a short description of what the account will be used for (optional)

Click  to create the API user.

AUTHORISATION

Each resource request needs to include Basic Authentication credentials of an API User that has the relevant access granted to it for that resource.

Click [Access List](#) to display the Access List dialog where the API user access permissions can be configured for each API resource. The Allowed Actions column displays which actions can be configured for each resource.

Access List API

Resource Listing

Resource	Read	Create	Update	Allowed Actions
Appointments	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Read,Create,Update

Read Conditions

OK Cancel

Click  to accept the changes and close the pop-up dialog.

Click  to discard the changes and close the pop-up dialog.

Click Save  on the System Settings window to save all changes.

Assigning access permissions to the Patient Recalls resource to an API user will disable the Recalls Wizard in Optomate Touch, recalls can only be processed either in Optomate Touch or via the API, but not both.

Read Conditions

Each resource may have a set of conditions that can be configured to restrict the data that gets returned in the Get (Read) requests.

Patients

Read Conditions

Restrict to read ID, Title, Given, Middle, Surname & DOB only

By default, all patients' fields are returned in the Get requests. Ticking the check box in Optomate Touch will restrict the Get requests to return only the fields listed in the condition for the selected API user.

Spectacle Lens Orders

Read Conditions

Supplier All Suppliers

If the "All Suppliers" check box is ticked then all Spectacle Lens Orders will be returned in the Get requests. If a single Supplier is selected in the dropdown list then only the Spectacle Lens Orders for that supplier will be returned.

Contact Lens Orders

Read Conditions

Supplier All Suppliers

If the "All Suppliers" check box is ticked then all Contact Lens Orders will be returned in the Get requests. If a single Supplier is selected in the dropdown list then only the Contact Lens Orders for that supplier will be returned.

Patient Recalls

Conditions

Letter Email SMS Telephone

The API will return only Patient Recalls for the selected Contact Methods. If no Contact Methods are selected then the API will return an error.

OPTOMATE TOUCH API

DETAILS

Type	RESTful Web API that supports OData queries
Name	Optomate Touch API
Base URI	<a href="http(s)://<hostname>:<port>/OptomateTouch/OData4/">http(s)://<hostname>:<port>/OptomateTouch/OData4/
Message Format	JSON

The service format description can be viewed using the **\$metadata** option.

Resources and Property names are CASE SENSITIVE. Resources are in CamelCase, Properties are in UPPERCASE.

Sample JSON message

```
{
  "ID": "4",
  "FIRST_NAME": "Joe",
  "LAST_NAME": "Bloggs",
  "AGE": 32,
  "INTERESTS": [
    {
      "ID": "1",
      "NAME": "Arts"
    },
    {
      "ID": "2",
      "NAME": "Movies"
    }
  ]
}
```

Any resource property of type record or Collection can be retrieved by using the OData **\$expand** query option. See appendices for examples.

ODATA

The API supports OData queries utilising OData v4. OData (Open Data Protocol) is an ISO/IEC approved, OASIS standard that defines a set of best practices for building and consuming RESTful APIs. Supported OData query options are: \$select, \$expand, \$filter, \$orderby, \$top, \$skip, \$count and \$apply.

See Appendices for examples. For more information please refer to <https://www.odata.org/>.

PRIMITIVE JSON VALUE FORMATS

Null values are represented as the JSON literal null.

Values of type Edm.Boolean are represented as the JSON literals true and false

Values of types Edm.Byte, Edm.SByte, Edm.Int16, Edm.Int32, Edm.Int64, Edm.Decimal, Edm.Single and Edm.Double are represented as JSON numbers.

Values of type Edm.String, Edm.Binary, Edm.DateTimeOffset, Edm.Date, Edm.TimeOfDay and Edm.Guid are represented as JSON strings.

REQUEST

The Optomate Touch API implements the standard HTTP Request Methods as follows:

HTTP Method	Action
GET <Resource>	Return all records of the requested resource
GET <Resource>(ID)	Return a single record matched on the specified ID
POST <Resource>	Create the submitted resource
PUT <Resource>(ID)	Update the submitted resource providing all properties
PATCH <Resource>(ID)	Update the submitted resource providing only changes

The HTTP methods that are allowed to be performed will vary from resource to resource and these are described in the following sections of the document.

RESPONSE

The Optomate Touch API returns standard HTTP Responses such as:

HTTP Status Code	Response
200	OK
201	Created
202	Accepted
400	Bad Request
401	Unauthorized
404	Not Found
409	Conflict
500	Internal Server Error

On successful request the following response is returned

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>

When an error code is returned, an OData error may also be returned in the output.

Sample OData Error

```

{"error": {
  "code": "",
  "message": "No HTTP resource was found that matches the request URI
'http://localhost:12000/OptomateTouch/odata4/UnknownResource'.",
  "innererror": {
    "message": "No routing convention was found to select an action for the OData path with template '~/entityset'.",
    "type": "",
    "stacktrace": ""
  }
}}

```

Custom Errors

The API will return the following generic custom OData errors:

Code	Message
100	Missing Credentials!
101	Invalid Credentials!
102	The supplied User is disabled!
103	The supplied API User does not have the required permissions for this request!
200	The supplied request is invalid!
300	The record is currently locked for editing!
400	Validation Error for [<field>]: <DB validation message>
401	Validation Error for [<field>]: The value is required!
402	Validation Error for [<field>]: The field <field> must be a string or array type with a maximum length of '<n>'.
403	Validation Error for [<field>]: The value already exists!
404	Validation Error for [<field>]: The value is not found!
405	Validation Error for [<field>]: The value is not allowed!
500	Failed to Save Changes into Optomate: <reason>

Appointments

Code	Message
800	STARTTIME must be earlier than ENDTIME!
801	Only 5-minute time intervals are allowed for STARTTIME/ENDTIME!
802	The Optometrist has another appointment at the specified time.
803	The appointment falls inside the Optometrist's adjusted inactive time.
804	The appointment falls outside the Optometrist's adjusted active time.
805	The appointment falls outside the Optometrist's scheduled active time.
806	The appointment has been marked as 'Do Not Move!'.

Barcode Queue

Code	Message
810	The STOCK_ID cannot be found for the given BRANCH_IDENTIFIER!

Inventory Arrivals

Code	Message
815	At least one ITEM needs to be included in the Inventory Arrival!

Purchase Orders

Code	Message
820	At least one ITEM needs to be included in the Purchase Order!

Spectacle / Contact Lens Orders

Code	Message
825	At least one of LEFT_LENS_BARCODE, RIGHT_LENS_BARCODE and SPECFRAME_BARCODE needs to be supplied!
826	RXDATE must be a past date no older than 2 years.
827	DISPENSER_IDENTIFIER is not an active Dispenser or Optometrist
828	At least one of LEFT_LENS_BARCODE or RIGHT_LENS_BARCODE needs to be supplied!

Patient Recalls

Code	Message
830	Recall has already been sent!
831	Recall must have a DATE_DUE!
832	DATE_RUN must be greater or equal to recall DATE_DUE!
833	No Recall Contact Methods are permitted!

Spectacle / Contact Lens Rx's

Code	Message
835	EXPIRY_DATE cannot be older than RXDATE!
836	RIGHT_EYE_ONLY and LEFT_EYE_ONLY cannot both be TRUE!

Institution Receipts

Code	Message
840	The PATIENT_ID does not match the ID on the Invoice
841	The DATE_OF_PAYMENT cannot be a future date
842	There's no outstanding Invoice amount for the Institution
843	The AMOUNT_PAID does not match the outstanding invoice amount for the Institution

Inventory Returns

Code	Message
850	At least one ITEM needs to be included in the Inventory Return!
851	The RETURN_DATE cannot be a future date
852	The CREDIT_ENT_DATE cannot be a future date
853	The CREDIT_DATE cannot be a future date

Sensitive Search

Code	Message
860	Missing or invalid search parameter!
861	Missing And/Or construct!
862	Invalid predicate!
863	Missing property name!
864	Invalid {type} property {propertyName}!

Optometrists

Code	Message
870	Optometrist is inactive or not included in the Appointment Book
871	<start_date> must be earlier than <finish_date>!

Examinations

Code	Message
880	Examination is Finalised

Patient Category Links

Code	Message
885	The Patient is already linked to the Patient Category

Patients

Code	Message
890	The Patient cannot be set to Inactive, there is an outstanding balance.
891	The Patient cannot be set to Inactive, there are outstanding spectacle orders.
892	The Patient cannot be set to Inactive, there are outstanding contact orders.
893	The Patient cannot be set to Inactive, there are outstanding repairs.
894	The Patient cannot be set to Inactive, they are a main contact for a family group.
895	The Patient cannot be set to Inactive, there are future appointments.

RESOURCES

All requests of type Post, Put and Patch upon a successful request will produce an output of type Result containing the resource Id.

Name	Type	Null
ID	Int32	<input checked="" type="checkbox"/>

On each Put or Patch request the API will check whether the requested resource is locked of editing in Optomate Touch.

APPOINTMENT TRANSACTIONS

GET AppointmentTransactions(ID)

Gets a single Appointment Transaction based on the specified ID.

Output

Appointment Transaction record.

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
TRANSACTION	String (100)	<input checked="" type="checkbox"/>
DESCRIPTION	String (4000)	<input checked="" type="checkbox"/>
START_TIME	DateTimeOffset yyyy-MM-ddTHH:mm:sszzz	<input checked="" type="checkbox"/>
FINISH_TIME	DateTimeOffset yyyy-MM-ddTHH:mm:sszzz	<input checked="" type="checkbox"/>

APPOINTMENT_ID	Int64	<input checked="" type="checkbox"/>
BRANCH_IDENTIFIER	String (20)	<input checked="" type="checkbox"/>
OPTOMETRIST_ID	Int64	<input checked="" type="checkbox"/>
PATIENT_ID	Int64	<input checked="" type="checkbox"/>
STATUS	Int32	<input checked="" type="checkbox"/>
DURATION	Int64	<input checked="" type="checkbox"/>

GET AppointmentTransactions

Gets all Appointment Transactions in Optomate Touch.

Output

A Collection of Appointment Transaction records.

APPOINTMENTS

GET Appointments(ID)

Gets a single Appointment based on the specified ID.

Output

Appointment record.

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
DATE_ADDED	DateTimeOffset <i>yyyy-MM-ddTHH:mm:ssffzzz</i>	<input checked="" type="checkbox"/>
USER_ADDED	String (20)	<input checked="" type="checkbox"/>
DATE_EDITED	DateTimeOffset <i>yyyy-MM-ddTHH:mm:ssffzzz</i>	<input checked="" type="checkbox"/>
USER_EDITED	String (20)	<input checked="" type="checkbox"/>
STARTDATETIME	DateTimeOffset <i>yyyy-MM-ddTHH:mm:sszzz</i>	<input checked="" type="checkbox"/>
ENDDATETIME	DateTimeOffset <i>yyyy-MM-ddTHH:mm:sszzz</i>	<input checked="" type="checkbox"/>
COMMENTS	String (4000)	<input checked="" type="checkbox"/>
CAPTION	String (100)	<input checked="" type="checkbox"/>
BRANCH_IDENTIFIER	String (20)	<input checked="" type="checkbox"/>
OPTOMETRIST_ID	Int32	<input checked="" type="checkbox"/>
APPOINTMENT_TYPE	String (20)	<input checked="" type="checkbox"/>
PATIENT_ID	Int32	<input checked="" type="checkbox"/>
STATUS	Int32	<input checked="" type="checkbox"/>
IS_BREAK	Boolean	<input checked="" type="checkbox"/>
LOCK_APP	Boolean	<input checked="" type="checkbox"/>
DURATION	Int32	<input checked="" type="checkbox"/>

GET Appointments

Gets all Appointments in Optomate Touch.

Output

A Collection of Appointment records.

POST Appointments/OptometristsAvailability

Gets Optometrists' availability in a given time period at a given branch. Available time is displayed in time blocks for each day in the selected time period for a given list of Optometrists. If a list of Optometrists is not provided then availability is returned for all Optometrists at the given branch.

Input

Name	Type : Default	Null
SEARCH	Record (Search)	<input type="checkbox"/>

SEARCH

Name	Type : Default	Null
BRANCH_IDENTIFIER	String (20)	<input type="checkbox"/>
STARTDATETIME	DateTime <i>yyyy-MM-ddTHH:mm</i>	<input type="checkbox"/>
ENDDATETIME	DateTime <i>yyyy-MM-ddTHH:mm</i>	<input type="checkbox"/>
OPTOMETRIST_IDS	Collection (Int64)	<input checked="" type="checkbox"/>

Output

List of Optometrists' Availabilities. SCHEDULE displays the Optometrists' start and end times while AVAILABLE_TIMEBLOCKS are the free times for each day.

Name	Type	Null
OPTOMETRISTS	Collection (Optometrist Availability)	<input type="checkbox"/>

Optometrist Availability

Name	Type	Null
ID	Int64	<input type="checkbox"/>
GIVEN_NAME	String (100)	<input type="checkbox"/>
SURNAME	String (200)	<input type="checkbox"/>
SCHEDULE	Collection (Time Block)	<input checked="" type="checkbox"/>
AVAILABLE_TIMEBLOCKS	Collection (Time Block)	<input checked="" type="checkbox"/>

Time Block

Name	Type	Null
STARTDATETIME	DateTimeOffset <i>yyyy-MM-ddTHH:mm:sszzz</i>	<input type="checkbox"/>
ENDDATETIME	DateTimeOffset <i>yyyy-MM-ddTHH:mm:sszzz</i>	<input type="checkbox"/>

POST Appointment

Creates an Appointment in Optomate Touch.

Input

Name	Type : Default	Null
STARTDATE	Date <i>yyyy-MM-dd</i>	<input type="checkbox"/>
STARTTIME	TimeOfDay <i>HH:mm</i>	<input type="checkbox"/>
ENDTIME	TimeOfDay <i>HH:mm</i> : <Calculated based on Optomate settings>	<input checked="" type="checkbox"/>
COMMENTS	String (4000)	<input checked="" type="checkbox"/>

CAPTION	String (100)	<input checked="" type="checkbox"/>
BRANCH_IDENTIFIER	String (20)	<input checked="" type="checkbox"/>
OPTOMETRIST_ID	Int64	<input checked="" type="checkbox"/>
APPOINTMENT_TYPE	String (20)	<input checked="" type="checkbox"/>
PATIENT_ID	Int64	<input checked="" type="checkbox"/>
LOCK_APP	Boolean : false	<input checked="" type="checkbox"/>

Output

The response will contain the Appointment ID and an additional message if the Patient already has a future appointment that is not cancelled: *"Please note that {GIVEN} {SURNAME} has an appointment booked for {STARTDATE (MMM dd yyyy)} at {STARTTIME (hh:mm tt)}"*

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
MESSAGE	String	<input checked="" type="checkbox"/>

PUT Appointment(ID)

Updates an Appointment in Optomate Touch based on the specified ID.

Input

Name	Type : Default	Null
STARTDATE	Date <i>yyyy-MM-dd</i>	<input checked="" type="checkbox"/>
STARTTIME	TimeOfDay <i>HH:mm</i>	<input checked="" type="checkbox"/>
ENDTIME	TimeOfDay <i>HH:mm</i> : <Calculated based on Optomate settings>	<input checked="" type="checkbox"/>
COMMENTS	String (4000)	<input checked="" type="checkbox"/>
CAPTION	String (100)	<input checked="" type="checkbox"/>
BRANCH_IDENTIFIER	String (20)	<input checked="" type="checkbox"/>
OPTOMETRIST_ID	Int64	<input checked="" type="checkbox"/>
APPOINTMENT_TYPE	String (20)	<input checked="" type="checkbox"/>
PATIENT_ID	Int64	<input checked="" type="checkbox"/>
CANCEL_APPOINTMENT	Boolean : false	<input checked="" type="checkbox"/>
STATUS	Int32 <i>Will be ignored if null or CANCEL_APPOINTMENT is set</i>	<input checked="" type="checkbox"/>
LOCK_APP	Boolean : false	<input checked="" type="checkbox"/>

PATCH Appointment(ID)

Same as Put except only the updated properties need to be supplied.

Validation

The API will validate the following on Post (OptometristsAvailability)

Values for all properties that cannot be Null are supplied
Supplied values for BRANCH_IDENTIFIER exist in Optomate Touch
ENDDATETIME must be greater than STARTDATETIME

The API will validate the following on Post, Put or Patch (Appointment)

Values for all properties that cannot be Null are supplied
Supplied values for OPTOMETRIST_ID, BRANCH_IDENTIFIER, APPOINTMENT_TYPE and PATIENT_ID exist in Optomate Touch
ENDTIME must be greater than STARTTIME

The Optometrist is available on the specified date/time i.e. the appointment does not:

- clash with another appointment at the same Branch
- fall inside the Optometrist's adjusted inactive time
- fall outside the Optometrist's adjusted active time
- fall outside the Optometrist's scheduled active time

BARCODE QUEUE

GET BarcodeQueueItems(ID)

Gets a single Barcode Queue Item based on the specified ID.

Output

Barcode Queue Item record.

Name	Type	Null
ID	Int64	<input type="checkbox"/>
DATE_ADDED	DateTimeOffset <i>yyyy-MM-ddTHH:mm:ssffzzz</i>	<input type="checkbox"/>
USER_ADDED	String (20)	<input type="checkbox"/>
STOCK_ID	Int64	<input type="checkbox"/>
BARCODE	String (20)	<input checked="" type="checkbox"/>
DESCRIPTION	String (100)	<input checked="" type="checkbox"/>
QTY	Int32	<input type="checkbox"/>
INCLUDE	Boolean	<input type="checkbox"/>
BRANCH_IDENTIFIER	String (20)	<input checked="" type="checkbox"/>
STOCK_TYPE	Int32	<input checked="" type="checkbox"/>

GET BarcodeQueueItems

Gets all Barcode Queue Items in Optomate Touch.

Output

A Collection of Barcode Queue Item records.

POST BarcodeQueueItem

Creates a Barcode Queue Item in Optomate Touch.

Input

Name	Type	Null
STOCK_ID	Int64	<input type="checkbox"/>
BRANCH_IDENTIFIER	String (20)	<input type="checkbox"/>
STOCK_TYPE	Int32	<input type="checkbox"/>

Validation

The API will validate the following on Post

- Values for all properties that cannot be Null are supplied
- The supplied value for BRANCH_IDENTIFIER exists in Optomate Touch
- Supplied value for STOCK_ID exists in Optomate Touch for the given BRANCH_IDENTIFIER
- Supplied value for STOCK_TYPE is a valid Static Reference Data value that has BARCODE_QUEUE set to true

BRANCHES

GET Branches(ID)

Gets a single Branch based on the specified ID.

Output

Branch record.

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
IDENTIFIER	String (20)	<input checked="" type="checkbox"/>
NAME	String (100)	<input checked="" type="checkbox"/>
ADDRESS	String (200)	<input checked="" type="checkbox"/>
SUBURB	String (50)	<input checked="" type="checkbox"/>
STATE	String (100)	<input checked="" type="checkbox"/>
POSTCODE	String (10)	<input checked="" type="checkbox"/>
PHONE	String (20)	<input checked="" type="checkbox"/>
FAX	String (10)	<input checked="" type="checkbox"/>
EMAIL	String (100)	<input checked="" type="checkbox"/>
WEBSITE	String (100)	<input checked="" type="checkbox"/>
ABN	String (15)	<input checked="" type="checkbox"/>
BUSINESS_PROVIDER_NUMBER	String (30)	<input checked="" type="checkbox"/>
DEFAULT_APP_DURATION	Int64	<input checked="" type="checkbox"/>
DEFAULT_OPTOMETRIST_ID	Int64	<input checked="" type="checkbox"/>
REGION_ID	Int64	<input checked="" type="checkbox"/>

GET Branches

Gets all Branches in Optomate Touch.

Output

Collection of Branch records.

PATCH Branch(ID)

Updates a Branch in Optomate Touch based on the specified ID.

Input

Name	Type : Default	Null
NAME	String (100)	<input checked="" type="checkbox"/>
ADDRESS	String (200)	<input checked="" type="checkbox"/>
SUBURB	String (50)	<input checked="" type="checkbox"/>
STATE	String (100)	<input checked="" type="checkbox"/>
POSTCODE	String (10)	<input checked="" type="checkbox"/>
PHONE	String (20)	<input checked="" type="checkbox"/>
FAX	String (10)	<input checked="" type="checkbox"/>
EMAIL	String (100)	<input checked="" type="checkbox"/>
WEBSITE	String (100)	<input checked="" type="checkbox"/>
ABN	String (15)	<input checked="" type="checkbox"/>
BUSINESS_PROVIDER_NUMBER	String (30)	<input checked="" type="checkbox"/>

The API will validate the following on Patch

Values for all properties that cannot be Null are supplied

BUSINESS DETAILS

GET BusinessDetails(ID)

Gets a single Business Detail based on the specified ID.

Output

Business Detail record.

Name	Type	Null
ID	Int64	<input type="checkbox"/>
BUSINESS_NAME	String (100)	<input type="checkbox"/>
ADDRESS	String (4000)	<input checked="" type="checkbox"/>
SUBURB	String (100)	<input checked="" type="checkbox"/>
STATE	String (100)	<input checked="" type="checkbox"/>
POSTCODE	String (10)	<input checked="" type="checkbox"/>
PHONE	String (20)	<input checked="" type="checkbox"/>
FAX	String (20)	<input checked="" type="checkbox"/>
EMAIL	String (100)	<input checked="" type="checkbox"/>
WEBSITE	String (100)	<input checked="" type="checkbox"/>
SOFTWARE_TYPE_ID	Int16	<input type="checkbox"/>

GET BusinessDetails

Gets all Business Details in Optomate Touch.

Output

Collection of Business Detail records.

CONSULTATION ITEMS

GET ConsultationItems(ID)

Gets a single Consultation Item based on the specified ID.

Output

Consultation Item record.

Name	Type	Null
ID	Int64	<input type="checkbox"/>
BARCODE	String (20)	<input type="checkbox"/>
DESCRIPTION	String (100)	<input type="checkbox"/>
MESSAGE	String (20)	<input checked="" type="checkbox"/>
MBS_ITEM_NUMBER	String (5)	<input checked="" type="checkbox"/>
CATEGORY_IDENTIFIER	String (20)	<input type="checkbox"/>
INSTITUTION_IDENTIFIER	String (20)	<input checked="" type="checkbox"/>
INITIAL_CONSULTATION	Boolean	<input type="checkbox"/>
PRINT_REF_ON_INVREC	Boolean	<input type="checkbox"/>

INCLUDE_MSG_ON_INVREC	Boolean	<input checked="" type="checkbox"/>
SCHUDULE_FEE	Decimal	<input checked="" type="checkbox"/>
DIRECT_FEE	Decimal	<input checked="" type="checkbox"/>
IS_GST	Boolean	<input checked="" type="checkbox"/>

GET ConsultationItems

Gets all Consultation Items in Optomate Touch.

Output

Collection of Consultation Item records.

CONTACT LENSES

GET ContactLenses(ID)

Gets a single Contact Lens based on the specified ID.

Output

Contact Lens record.

HML	String (1)	<input checked="" type="checkbox"/>

PATCH ContactLens(ID)

Same as Put except only the updated properties need to be supplied.

Validation

The API will validate the following on Post, Put or Patch

Values for all properties that cannot be Null are supplied
Supplied value for BARCODE is a unique value that does not already exist in Optomate Touch for any stock item
Supplied values for CATEGORY_IDENTIFIER, SUPPLIER_IDENTIFIER, BRAND_IDENTIFIER, INSTITUTION_IDENTIFIER, BRANCH_INFO.BRANCH_IDENTIFIER and MEASURES.ID exist in Optomate Touch
Supplied values for FREQUENCY, MEASURES.OPERATION (Resource Operations - only 'C' for Post) and MEASURES_INPUT.HML (Measures Hml) are valid Static Reference values
Value for MEASURES.ID is supplied when MEASURES.OPERATION is 'U' or 'D'

CONTACT LENS BRANDS

GET ContactLensBrands(ID)

Gets a single Contact Lens Brand based on the specified ID.

Output

Contact Lens Brand record.

Name	Type	Null
ID	Int64	<input type="checkbox"/>
DATE_ADDED	DateTimeOffset yyyy-MM-ddTHH:mm:ssffzzz	<input type="checkbox"/>
USER_ADDED	String (20)	<input type="checkbox"/>
DATE_EDITED	DateTimeOffset yyyy-MM-ddTHH:mm:ssffzzz	<input checked="" type="checkbox"/>
USER_EDITED	String (20)	<input checked="" type="checkbox"/>
IDENTIFIER	String (20)	<input type="checkbox"/>
SUPPLIER_ID	Int64	<input type="checkbox"/>

GET ContactLensBrands

Gets all Contact Lens Brands in Optomate Touch.

Output

Collection of Contact Lens Brand records.

POST ContactLensBrand

Creates a Contact Lens Brand in Optomate Touch.

Input

Name	Type	Null
IDENTIFIER	String (20)	<input checked="" type="checkbox"/>
SUPPLIER_ID	Int64	<input checked="" type="checkbox"/>

Validation

The API will validate the following on Post

Values for all properties that cannot be Null are supplied

Supplied value for IDENTIFIER is a unique value that does not already exist in Optomate Touch for the associated Supplier

Supplied value for SUPPLIER_IDENTIFIER exists in Optomate Touch

CONTACT LENS ORDERS

Has Read Conditions, see Security->Authorization->Read Conditions.

GET ContactLensOrders(ID)

Gets a single Contact Lens Order based on the specified ID.

Output

Contact Lens Order record.

PATCH ContactLensOrder(ID)

Updates a Contact Lens Order in Optomate Touch based on the specified ID.

Input

Name	Type : Default	Null
ORDERED_DATE	Date <i>yyyy-MM-dd</i>	<input checked="" type="checkbox"/>
API_STATUS	String (100)	<input checked="" type="checkbox"/>
CANCELLED	Boolean	<input checked="" type="checkbox"/>
CANCELLED_REASON_ID	Int64	<input checked="" type="checkbox"/>
PRACTICE_COMMENTS	String (4000)	<input checked="" type="checkbox"/>

Validation

The API will validate the following on Post

Values for all properties that cannot be Null are supplied
RXDATE is a past date no older than 2 years
At least one of LEFT_LENS_BARCODE or RIGHT_LENS_BARCODE is supplied
Supplied values for PATIENT_ID, BRANCH_IDENTIFIER, DELIVERY_BRANCH, SUPPLIER_IDENTIFIER, LEFT_LENS_BARCODE, RIGHT_LENS_BARCODE and LEFT_TINT_IDENTIFIER exist in Optomate Touch
Supplied values for LEFT_DNHML, RIGHT_DNHML (Contact Lens Order Types) and LEFT_MONO_DN and RIGHT_MONO_DN (Contact Lens Mono) are valid Static Reference values
Supplied value for DISPENSER_IDENTIFIER is an active Optometrist or Dispenser in Optomate Touch

The API will validate the following on Patch

Value for CANCELLED_REASON_ID is supplied if CANCELLED is set to TRUE
Supplied value for CANCELLED_REASON_ID exists in Optomate Touch

CONTACT LENS RXS

GET ContactLensRxs(ID)

Gets a single Contact Lens Rx based on the specified ID.

Output

Contact Lens Rx record.

LEFT_EYE_ONLY	Boolean : False	<input checked="" type="checkbox"/>
PRACTICE_COMMENT	String (4000)	<input checked="" type="checkbox"/>

Validation

The API will validate the following on Post

Values for all properties that cannot be Null are supplied
EXPIRY_DATE cannot be older than RXDATE
Supplied values for PATIENT_ID, OPTOMETRIST_ID, BRANCH_IDENTIFIER, LEFT_LENS_BARCODE, RIGHT_LENS_BARCODE and LEFT_TINT_IDENTIFIER exist in Optomate Touch
Supplied values for LEFT_DNHML, RIGHT_DNHML (Contact Lens Order Types) and LEFT_MONO_DN and RIGHT_MONO_DN (Contact Lens Mono) are valid Static Reference values
RIGHT_EYE_ONLY and LEFT_EYE_ONLY cannot both be TRUE

CONTACT LENS TINTS

GET ContactLensTints(ID)

Gets a single Contact Lens Tint based on the specified ID.

Output

Contact Lens Tint record.

Name	Type : Default	Null
ID	Int64	<input checked="" type="checkbox"/>
DATE_ADDED	DateTimeOffset <i>yyyy-MM-ddTHH:mm:ssffzzz</i>	<input checked="" type="checkbox"/>

BRANCH_INFO	Contact Lens Tint Branch	<input checked="" type="checkbox"/>
INACTIVE	Boolean	<input type="checkbox"/>
FAVOURITE	Boolean	<input type="checkbox"/>

CONTACT LENS TINT BRANCH

Name	Type : Default	Null
BRANCH_IDENTIFIER	String (20)	<input checked="" type="checkbox"/>
COSTINC	Decimal : 0	<input checked="" type="checkbox"/>
COSTEX	Decimal : 0	<input checked="" type="checkbox"/>
SELLINC	Decimal : 0	<input checked="" type="checkbox"/>
INACTIVE	Boolean	<input checked="" type="checkbox"/>
FAVOURITE	Boolean	<input checked="" type="checkbox"/>

PATCH ContactLensTint(ID)

Same as Put except only the updated properties need to be supplied.

Validation

The API will validate the following on Post, Put or Patch

Values for all properties that cannot be Null are supplied
Supplied value for BARCODE is a unique value that does not already exist in Optomate Touch for any stock item
Supplied values for CATEGORY_IDENTIFIER, SUPPLIER_IDENTIFIER and BRANCH_INFO.BRANCH_IDENTIFIER exist in Optomate Touch

DISPENSERS

GET Dispensers(ID)

Gets a single active Dispenser based on the specified ID.

Output

Dispenser record.

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
IDENTIFIER	String (20)	<input checked="" type="checkbox"/>
BRANCH_IDENTIFIER	String (20)	<input checked="" type="checkbox"/>
GIVEN_NAME	String (100)	<input checked="" type="checkbox"/>
SURNAME	String (200)	<input checked="" type="checkbox"/>
INACTIVE	Boolean	<input checked="" type="checkbox"/>

GET Dispensers

Gets all active Dispensers in Optomate Touch.

Output

Collection of Dispenser records

EXAMINATIONS

GET Examinations(ID)

Gets a single Examination based on the specified ID.

Output

Examination record.

Name	Type	Null
ID	Int64	<input type="checkbox"/>
DATE_ADDED	DateTimeOffset <i>yyyy-MM-ddTHH:mm:ssffzzz</i>	<input type="checkbox"/>

Name	Type	Null
DESCRIPTION	String (60)	<input type="checkbox"/>
NOTES	String (4000)	<input type="checkbox"/>

GET Examinations(ID)/ExaminationContactLens

Gets a single Examination Contact Lens record related to the Examination based on the specified ID.

Output

Examination Contact Lens record. See Appendices for details.

GET Examinations(ID)/Optometrist

Gets a single Optometrist related to the Examination based on the specified ID.

Output

Optometrist record.

GET Examinations

Gets all Examinations in Optomate Touch.

Output

Collection of Examination records.

POST Examination

Creates an Examination in Optomate Touch.

Input

Name	Type : Default	Null
EXAM_DATE	Date <i>yyyy-MM-dd</i>	<input type="checkbox"/>
EXAM_TIME	TimeOfDay <i>hh:mm tt</i>	<input type="checkbox"/>
PATIENT_ID	Int64	<input type="checkbox"/>
BRANCH_IDENTIFIER	String (20)	<input type="checkbox"/>
OPTOMETRIST_ID	Int64	<input type="checkbox"/>
DETAILS	Record (Examination Detail Input)	<input checked="" type="checkbox"/>

PUT Examination(ID)

Updates an Examination in Optomate Touch based on the specified ID. A Finalised Examination cannot be updated.

Input

Name	Type : Default	Null
DETAILS	Record (Examination Detail Input)	<input checked="" type="checkbox"/>

PATCH Examination(ID)

Same as Put except only the updated properties need to be supplied.

Examination Detail Input

Name	Type	Null
ADVICE_MANAGEMENT_NOTE	String (4000)	<input checked="" type="checkbox"/>
COMPLAINT_NOTE	String (4000)	<input checked="" type="checkbox"/>
COMPLETED	Boolean	<input checked="" type="checkbox"/>
GENERAL_HEALTH_NOTE	String (4000)	<input checked="" type="checkbox"/>
PAST_OCULAR_HISTORY_NOTE	String (4000)	<input checked="" type="checkbox"/>
FAMILY_OCULAR_HISTORY_NOTE	String (4000)	<input checked="" type="checkbox"/>

Validation

The API will validate the following on Post

Values for all properties that cannot be Null are supplied

Supplied values for OPTOMETRIST_ID, BRANCH_IDENTIFIER and PATIENT_ID exist in Optomate Touch

The API will validate the following on Put and Patch

The Examination is not Finalised

HEALTH FUNDS

GET HealthFunds(ID)

Gets a single Health Fund based on the specified ID.

Output

Health Fund record.

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
IDENTIFIER	String (20)	<input checked="" type="checkbox"/>
NAME	String (100)	<input checked="" type="checkbox"/>
ADDRESS	String (200)	<input checked="" type="checkbox"/>

PHONE2	String (20)	<input checked="" type="checkbox"/>
FAX	String (20)	<input checked="" type="checkbox"/>
EMAIL	String (100)	<input checked="" type="checkbox"/>
WEBSITE	String (100)	<input checked="" type="checkbox"/>
CONTACT	String (20)	<input checked="" type="checkbox"/>
NOTES	String (4000)	<input checked="" type="checkbox"/>
REBATE	String (1)	<input checked="" type="checkbox"/>

GET HealthFunds

Gets all Health Funds in Optomate Touch.

OUTPUT

Collection of Health Fund records.

FRAME CONSTRUCTIONS

GET FrameConstructions(ID)

Gets a single Frame Construction based on the specified ID.

Output

Frame Construction record.

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
IDENTIFIER	String (20)	<input checked="" type="checkbox"/>
NAME	String (50)	<input checked="" type="checkbox"/>

GET FrameConstructions

Gets all Frame Constructions in Optomate Touch.

OUTPUT

Collection of Frame Construction records.

FRAME BRANDS

GET FrameBrands(ID)

Gets a single Frame Brand based on the specified ID.

Output

Frame Brand record.

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
DATE_ADDED	DateTimeOffset <i>yyyy-MM-ddTHH:mm:ssffzzz</i>	<input checked="" type="checkbox"/>
USER_ADDED	String (20)	<input checked="" type="checkbox"/>
DATE_EDITED	DateTimeOffset <i>yyyy-MM-ddTHH:mm:ssffzzz</i>	<input checked="" type="checkbox"/>
USER_EDITED	String (20)	<input checked="" type="checkbox"/>

IDENTIFIER	String (20)	<input type="checkbox"/>
SUPPLIER_ID	Int64	<input type="checkbox"/>
DOWNLOAD	Boolean	<input type="checkbox"/>

GET FrameBrands

Gets all Frame Brands in Optomate Touch.

OUTPUT

Collection of Frame Brand records.

POST FrameBrand

Creates a Frame Brand in Optomate Touch.

Input

Name	Type : Default	Null
IDENTIFIER	String (20)	<input type="checkbox"/>
SUPPLIER_ID	Int64	<input type="checkbox"/>
DOWNLOAD	Boolean : False	<input checked="" type="checkbox"/>

PUT FrameBrand(ID)

Updates a Frame Brand in Optomate Touch based on the specified ID.

Input

Name	Type : Default	Null
DOWNLOAD	Boolean : False	<input checked="" type="checkbox"/>

Validation

The API will validate the following on Post or Put

Values for all properties that cannot be Null are supplied
Supplied value for IDENTIFIER is a unique value that does not already exist in Optomate Touch for the associated Supplier
Supplied value for SUPPLIER_ID exists in Optomate Touch

FRAME MATERIALS

GET FrameMaterials(ID)

Gets a single Frame Material based on the specified ID.

Output

Frame Material record.

Name	Type	Null
ID	Int64	<input type="checkbox"/>
IDENTIFIER	String (20)	<input type="checkbox"/>
NAME	String (50)	<input type="checkbox"/>

GET FrameMaterials

Gets all Frame Materials in Optomate Touch.

OUTPUT

Collection of Frame Material records.

INSTITUTIONS

GET Institutions(ID)

Gets a single Institution based on the specified ID.

Output

Institution record.

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
IDENTIFIER	String (20)	<input checked="" type="checkbox"/>
NAME	String (50)	<input checked="" type="checkbox"/>

GET Institutions

Gets all Institutions in Optomate Touch.

OUTPUT

Collection of Institution records.

INSTITUTION RECEIPTS

GET InstitutionReceipts(ID)

Gets a single Institution Receipt based on the specified ID.

Output

Institution Receipt record.

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
DATE_ADDED	DateTimeOffset <i>yyyy-MM-ddTHH:mm:ssffzzz</i>	<input checked="" type="checkbox"/>
USER_ADDED	String (20)	<input checked="" type="checkbox"/>
DATE_EDITED	DateTimeOffset <i>yyyy-MM-ddTHH:mm:ssffzzz</i>	<input checked="" type="checkbox"/>
USER_EDITED	String (20)	<input checked="" type="checkbox"/>
INSTITUTION_ID	Int64	<input checked="" type="checkbox"/>
PAID_AMOUNT	Decimal	<input checked="" type="checkbox"/>
DATE_OF_PAYMENT	Date <i>yyyy-MM-dd</i>	<input checked="" type="checkbox"/>
BRANCH_IDENTIFIER	String (20)	<input checked="" type="checkbox"/>
REBATE_PAYMENTS	Collection (Rebate Payment)	<input checked="" type="checkbox"/>

REBATE PAYMENT

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
PATIENT_ID	Int64	<input checked="" type="checkbox"/>
INVOICE_ID	Int64	<input checked="" type="checkbox"/>
INVOICE_ITEM_ID	Int64	<input checked="" type="checkbox"/>
PAID_AMOUNT	Decimal	<input checked="" type="checkbox"/>

POST InstitutionReceipt

Creates an Institution Receipt in Optomate Touch.

Input

Name	Type : Default	Null
INSTITUTION_ID	Int64	<input checked="" type="checkbox"/>
PATIENT_ID	Int64	<input checked="" type="checkbox"/>
INVOICE_ID	Int64	<input checked="" type="checkbox"/>
PAID_AMOUNT	Decimal	<input checked="" type="checkbox"/>
PAYMENT_TYPE_CODE	String (3)	<input checked="" type="checkbox"/>
DATE_OF_PAYMENT	Date <i>yyyy-MM-dd</i> : <Current Date>	<input checked="" type="checkbox"/>
BRANCH_IDENTIFIER	String (20)	<input checked="" type="checkbox"/>
OPTOMETRIST_ID	Int64	<input checked="" type="checkbox"/>

Validation

The API will validate the following on Post

Values for all properties that cannot be Null are supplied
Supplied values for INVOICE_ID, INSTITUTION_ID, PATIENT_ID, OPTOMETRIST_ID and BRANCH_IDENTIFIER exist in Optomate Touch
The supplied PATIENT_ID needs to match the ID on the Invoice
The DATE_OF_PAYMENT cannot be a future date
The Invoice must have an outstanding amount for the Institution
The AMOUNT_PAID must match the outstanding invoice amount for the Institution

INTERESTS

GET Interests(ID)

Gets a single Interest based on the specified ID.

Output

Interest record.

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
NAME	String (200)	<input checked="" type="checkbox"/>

GET Interests

Gets all Interests in Optomate Touch.

OUTPUT

Collection of Interest records.

INVENTORY ARRIVALS

GET InventoryArrivals(ID)

Gets a single Inventory Arrival based on the specified ID.

Output

Inventory Arrival record.

Name	Type	Null
ID	Int64	<input type="checkbox"/>
DATE_ADDED	DateTimeOffset <i>yyyy-MM-ddTHH:mm:ssffzz</i>	<input type="checkbox"/>

QTY	Int32	<input checked="" type="checkbox"/>
ITEM_COMMENT	String (100)	<input checked="" type="checkbox"/>
DISCOUNT_PERCENT	Double : 0	<input checked="" type="checkbox"/>
LIST_PRICEEX	Decimal : <Item List Price>	<input checked="" type="checkbox"/>

Validation

The API will validate the following on Post

Values for all properties that cannot be Null are supplied
At least one ITEM is included in the Inventory Arrival
Supplied values for SUPPLIER_IDENTIFIER, BRANCH_IDENTIFIER, ARRIVAL_TYPE and ITEM. STOCK_TYPE_ID exist in Optomate Touch
Supplied value for ITEM.ID exists in Optomate Touch for the stock type and related supplier

Supplied value for ITEMS.QTY is a positive value

Supplied values for ITEMS.LIST_PRICEEX and ITEMS.DISCOUNT_PERCENT are not negative values

INVENTORY MOVEMENTS

GET InventoryMovements(ID)

Gets a single Inventory Movement based on the specified ID.

Output

Inventory Movement record.

Name	Type	Null
ID	Int64	<input type="checkbox"/>
DATE_ADDED	DateTimeOffset yyyy-MM-ddTHH:mm:ssffzz	<input type="checkbox"/>

GET ItemCategories

Gets all Item Categories in Optomate Touch.

OUTPUT

Collection of Item Category records.

OCCUPATIONS

GET Occupations(ID)

Gets a single Occupation based on the specified ID.

Output

Occupation record.

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
NAME	String (200)	<input checked="" type="checkbox"/>

GET Occupations

Gets all Occupations in Optomate Touch.

Output

Collection of Occupation records.

ONLINE APPOINTMENT TYPES

GET OnlineAppointmentTypes(ID)

Gets a single Online Appointment Type based on the specified ID.

Output

Online Appointment Type record.

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
IDENTIFIER	String (20)	<input checked="" type="checkbox"/>
DESCRIPTION	String (200)	<input checked="" type="checkbox"/>
DEFAULT_DURATION	Int32	<input checked="" type="checkbox"/>

GET OnlineAppointmentTypes

Gets all Online Appointment Types in Optomate Touch.

Output

Collection of Online Appointment Type records.

OPTOMETRISTS

GET Optometrists(ID)

Gets a single active Optometrist based on the specified ID.

Output

Optometrist record.

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>

GET Optometrists(ID)/Examinations

Gets all related Examinations for an Optometrist based on the specified ID.

Output

Collection of Examination records.

GET Optometrists

Gets all Optometrists in Optomate Touch.

Output

Collection of Optometrist records.

POST Optometrist(ID)/AppSetup

Creates an Appointment Schedule Setup for an Optometrist based on the specified ID. If the Schedule Setup exists for the supplied BRANCH_IDENTIFIER then it will be updated.

Input

Name	Type	Null
APP_SETUP	Record (Appointment Schedule Setup)	<input checked="" type="checkbox"/>

APPOINTMENT SCHEDULE SETUP

Name	Type : Default	Null
BRANCH_IDENTIFIER	String (20)	<input checked="" type="checkbox"/>
DEFAULT_DURATION	Int64 {0, 5, 10, 15, 20, 30, 60} : 0 (Not set)	<input checked="" type="checkbox"/>

SUNACTIVE	Boolean : false	<input checked="" type="checkbox"/>
DEFAULT_APP_TYPE	String (3) : "" (Not set)	<input checked="" type="checkbox"/>

POST Optometrist(ID)/AppAdjust

Creates an Appointment Schedule Adjustment for an Optometrist based on the specified ID. If the Schedule Adjustment exists for the supplied ADJUST_DATE and BRANCH_IDENTIFIER then it will be updated.

Input

Name	Type	Null
APP_ADJUST	Record (Appointment Schedule Adjustment)	<input checked="" type="checkbox"/>

APPOINTMENT SCHEDULE ADJUSTMENT

Name	Type : Default	Null
ADJUST_DATE	Date <i>yyyy-MM-dd</i>	<input checked="" type="checkbox"/>
BRANCH_IDENTIFIER	String (20)	<input checked="" type="checkbox"/>
ADJUST_START	TimeOfDay <i>hh:mm tt</i>	<input checked="" type="checkbox"/>
ADJUST_FINISH	TimeOfDay <i>hh:mm tt</i>	<input checked="" type="checkbox"/>
INACTIVE	Boolean : false	<input checked="" type="checkbox"/>

Validation

The API will validate the following on Post for AppSetup

Values for all properties that cannot be Null are supplied
Supplied values for BRANCH_IDENTIFIER and DEFAULT_APP_TYPE exist in Optomate Touch
All start and finish time values are in the expected time format
Values are supplied for start and finish times for active days
Start time values have an earlier time than finish times values

The API will validate the following on Post for AppAdjust

Values for all properties that cannot be Null are supplied
The Optometrist is not inactive and is included in the Appointment Book
Supplied values for BRANCH_IDENTIFIER exist in Optomate Touch
ADJUST_START and ADJUST_FINISH are in the expected time format
ADJUST_START is an earlier time than ADJUST_FINISH

ORDER CANCELLED REASONS

GET OrderCancelledReasons(ID)

Gets a single active Order Cancelled Reason based on the specified ID.

Output

Order Cancelled Reason record.

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
REASON	String (100)	<input checked="" type="checkbox"/>

GET OrderCancelledReasons

Gets all active Order Cancelled Reasons in Optomate Touch.

Output

Collection of Order Cancelled Reason records

OTHER ITEMS

GET OtherItems(ID)

Gets a single Other Item based on the specified ID.

Output

Other Item record.

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
DATE_ADDED	DateTimeOffset <i>yyyy-MM-ddTHH:mm:ss.fffzzz</i>	<input checked="" type="checkbox"/>

INVENTORY	Boolean : false	<input checked="" type="checkbox"/>
INACTIVE	Boolean : false	<input checked="" type="checkbox"/>
FAVOURITE	Boolean : false	<input checked="" type="checkbox"/>

PATCH OtherItem(ID)

Same as Put except only the updated properties need to be supplied.

Validation

The API will validate the following on Post, Put or Patch

Values for all properties that cannot be Null are supplied
Supplied value for BARCODE is a unique value that does not already exist in Optomate Touch for any stock item
Supplied values for CATEGORY_IDENTIFIER, SUPPLIER_IDENTIFIER, INSTITUTION_IDENTIFIER and BRANCH_INFO.BRANCH_IDENTIFIER exist in Optomate Touch

PATIENT CATEGORY LINKS

GET PatientCategoryLinks(PATIENT_ID)

Gets a Collection of Patient Category Links based on the specified Patient ID.

Output

Collection of Patient Category Link records.

Name	Type	Null
ID	Int64	<input type="checkbox"/>
DATE_ADDED	DateTimeOffset yyyy-MM-ddTHH:mm:ss.fffzzz	<input type="checkbox"/>
USER_ADDED	String (20)	<input type="checkbox"/>
DATE_EDITED	DateTimeOffset yyyy-MM-ddTHH:mm:ss.fffzzz	<input checked="" type="checkbox"/>
USER_EDITED	String (20)	<input checked="" type="checkbox"/>
PATIENT_ID	Int64	<input type="checkbox"/>
PATIENT_CATEGORY_ID	Int64	<input type="checkbox"/>

GET PatientCategoryLinks

Gets all Patient Category Links in Optomate Touch.

Output

A Collection of Patient Category Links records.

POST PatientCategoryLink

Creates a Patient Category Link in Optomate Touch.

Input

Name	Type	Null
PATIENT_ID	Int64	<input type="checkbox"/>
PATIENT_CATEGORY_ID	Int64	<input type="checkbox"/>

PUT PatientCategoryLink(ID)

Updates a Patient Category Link in Optomate Touch based on the specified ID. Input same as Post.

PATCH PatientCategoryLink (ID)

Same as Put except only the updated properties need to be supplied.

Validation

Values for all properties that cannot be Null are supplied
--

Supplied values for PATIENT_ID and PATIENT_CATEGORY_ID exist in Optomate Touch
--

PATIENT_CATEGORY_ID is not already associated with the PATIENT_ID

PATIENT CATEGORIES

GET PatientCategories(ID)

Gets a single Patient Category based on the specified ID.

Output

Patient Category record.

Name	Type	Null
ID	Int64	<input type="checkbox"/>
IDENTIFIER	String (20)	<input type="checkbox"/>
NAME	String (4000)	<input type="checkbox"/>

GET PatientCategories

Gets all PatientCategories in Optomate Touch.

OUTPUT

Collection of Patient Category records.

PATIENT INTERESTS

GET PatientInterests(PATIENT_ID)

Gets a Collection of Patient Interests based on the specified Patient ID.

Output

Collection of Patient Interest records.

Name	Type	Null
ID	Int64	<input type="checkbox"/>
DATE_ADDED	DateTimeOffset yyyy-MM-ddTHH:mm:ss.fffzzz	<input type="checkbox"/>
USER_ADDED	String (20)	<input type="checkbox"/>
DATE_EDITED	DateTimeOffset yyyy-MM-ddTHH:mm:ss.fffzzz	<input checked="" type="checkbox"/>
USER_EDITED	String (20)	<input checked="" type="checkbox"/>
PATIENT_ID	Int64	<input type="checkbox"/>
INTEREST_NAME	String (200)	<input type="checkbox"/>

GET PatientInterests

Gets all Patient Interests in Optomate Touch.

Output

A Collection of Patient Interests records.

POST PatientInterest

Creates a Patient Interest in Optomate Touch.

Input

Name	Type	Null
PATIENT_ID	Int64	<input type="checkbox"/>
INTEREST_NAME	String (200)	<input type="checkbox"/>

Validation

The API will validate the following on Post

Values for all properties that cannot be Null are supplied

Supplied values for PATIENT_ID and INTEREST_NAME exist in Optomate Touch

INTEREST_NAME is not already associated with the Patient

PATIENT INVOICES

The API will include only those Invoices that are of type Cash Sale, Invoice, Return or Cash Sale Return.

GET PatientInvoices(ID)

Gets a single Patient Invoice based on the specified ID.

Output

Patient Invoice record.

Name	Type	Null

GET PatientInvoices

Gets all Patient Invoices in Optomate Touch.

Output

A Collection of Patient Invoices records.

PUT PatientInvoice(ID)

Updates a Patient Invoice in Optomate Touch based on the specified ID.

Input

Name	Type	Null
EXPORTED	Boolean	<input type="checkbox"/>

PATIENT NOTES

GET PatientNotes(PATIENT_ID)

Gets a Collection of Patient Notes based on the specified Patient ID.

Output

Collection of Patient Note records.

Name	Type	Null
ID	Int64	<input type="checkbox"/>
DATE_ADDED	DateTimeOffset <i>yyyy-MM-ddTHH:mm:ss.fffzzz</i>	<input type="checkbox"/>
USER_ADDED	String (20)	<input type="checkbox"/>

DESCRIPTION	String (4000)	<input checked="" type="checkbox"/>
NOTE	String (4000)	<input checked="" type="checkbox"/>

GET PatientNotes

Gets all Patient Notes in Optomate Touch.

Output

A Collection of Patient Notes records.

POST PatientNote

Creates a Patient Note in Optomate Touch.

Input

Name	Type : Default	Null
PATIENT_ID	Int64	<input type="checkbox"/>
BRANCH_IDENTIFIER	String (20)	<input type="checkbox"/>
NOTE_DATE	Date : Today <i>yyyy-MM-dd</i>	<input checked="" type="checkbox"/>
DESCRIPTION	String (4000)	<input checked="" type="checkbox"/>
NOTE	String (4000)	<input checked="" type="checkbox"/>

Validation

The API will validate the following on Post

Values for all properties that cannot be Null are supplied

Supplied values for PATIENT_ID and BRANCH_IDENTIFIER exist in Optomate Touch

NOTE_DATE is not a future date

PATIENT RECALLS

The API will include only those Patient Recalls that:

- have not been previously sent
- are linked to an active patient that does not have a future appointment
- that satisfy the Read Conditions, see Security->Authorization->Read Conditions

GET PatientRecalls(ID)

Gets a single Patient Recall based on the specified ID.

Output

Patient Recall record.

Name	Type	Null
ID	Int64	<input type="checkbox"/>
DATE_ADDED	DateTimeOffset <i>yyyy-MM-ddTHH:mm:ss.fffzzz</i>	<input type="checkbox"/>
USER_ADDED	String (20)	<input type="checkbox"/>

RECALL_COMMENT	String (50)	<input checked="" type="checkbox"/>
IDENTIFIER	String (20)	<input type="checkbox"/>
DESCRIPTION	String (200)	<input type="checkbox"/>
NO_MONTHS	Int32	<input type="checkbox"/>

EMAIL_SUBJECT	String (200)	<input checked="" type="checkbox"/>
BRANCH_IDENTIFIER	String (20)	<input checked="" type="checkbox"/>

GET PatientRecalls?dateRun=<val>

Gets all Patient Recalls in Optomate Touch that have a DATE_DUE that's on or before the supplied dateRun

Query Parameters

Name	Type : Default	Null
dateRun	Date <i>yyyy-MM-dd</i> : <Current Day>	<input checked="" type="checkbox"/>

Output

A Collection of Patient Recall records.

GET PatientRecalls/Sent

Gets all Patient Recalls that have been sent out.

Output

A Collection of Sent Recall records.

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
DATE_ADDED	DateTimeOffset <i>yyyy-MM-ddTHH:mm:ss.fffzzz</i>	<input checked="" type="checkbox"/>
USER_ADDED	String (20)	<input checked="" type="checkbox"/>

IDENTIFIER	String (20)	<input checked="" type="checkbox"/>
DESCRIPTION	String (200)	<input checked="" type="checkbox"/>
NO_MONTHS	Int32	<input checked="" type="checkbox"/>
BRANCH_IDENTIFIER	String (20)	<input checked="" type="checkbox"/>

PUT PatientRecall(ID)

Updates a Patient Recall in Optomate Touch based on the specified ID.

Input

Name	Type	Null
DATE_SENT	Date <i>yyyy-MM-dd</i>	<input checked="" type="checkbox"/>
SENT_VIA	String (20)	<input checked="" type="checkbox"/>
DATE_RUN	Date <i>yyyy-MM-dd</i>	<input checked="" type="checkbox"/>

POST PatientRecallsBatch

Updates a batch of Patient Recalls in Optomate Touch. The batch will not be processed partially, i.e. it will either fully succeed or fail showing the number of failed records.

Input

Name	Type	Null
PATIENT_RECALLS	Collection (Patient Recall Input)	<input checked="" type="checkbox"/>

PATIENT RECALL INPUT

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
DATE_SENT	Date <i>yyyy-MM-dd</i>	<input checked="" type="checkbox"/>
SENT_VIA	String (20)	<input checked="" type="checkbox"/>
DATE_RUN	Date <i>yyyy-MM-dd</i>	<input checked="" type="checkbox"/>

Output

Batch Result

Name	Type	Null
SUCCESS	Boolean	<input checked="" type="checkbox"/>
FAILED	Int32	<input checked="" type="checkbox"/>
ERRORS	Collection (Custom Errors {ID, Code, Message})	<input checked="" type="checkbox"/>

Validation

The API will validate the following on Post or Put

Values for all properties that cannot be Null are supplied
Supplied ID exists in Optomate Touch
Supplied values for SENT_VIA (Contact Methods) are valid Static Reference Data values
Recall has not been sent before
Recall has a DATE_DUE
DATE_RUN must be greater or equal to recall DATE_DUE

PATIENT RECEIPTS

GET PatientReceipts(ID)

Gets a single Patient Receipt based on the specified ID.

Output

Patient Receipt record.

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
DATE_ADDED	DateTimeOffset <i>yyyy-MM-ddTHH:mm:ss.fffzzz</i>	<input checked="" type="checkbox"/>

PATCH Patient(ID)

Same as Put except only the updated properties need to be supplied.

Validation

The API will validate the following on Post, Put or Patch

Values for all properties that cannot be Null are supplied
All compulsory items as specified in the System Settings of Optomate Touch
MEDICARE_NUMBER is a valid Medicare Number
MEDICARE_EXPIRY is not an expired date
Supplied values for OPTOMETRIST_ID, BRANCH_IDENTIFIER, OCCUPATION, SOURCE and HEALTHFUND_IDENTIFIER exist in Optomate Touch
Supplied values for GENDER (Person Gender), PREF_APPOINTMENTS, PREF_MARKETING, PREF_ORDERCOLL, PREF_RECALLINT, PREF_RECALLSUB and PREF_TELEPHONE (All Contact Methods) are valid Static Reference values
INACTIVE cannot be set to true if any of the following for the patient is true: <ul style="list-style-type: none"> - there is an outstanding balance - there are outstanding spectacle orders - there are outstanding contact orders - there are outstanding repairs - is a main contact for a family group - there are future appointments

PURCHASE ORDERS

GET PurchaseOrders(ID)

Gets a single Purchase Order based on the specified ID.

Output

Purchase Order record.

Name	Type	Null

PATCH PurchaseOrder(ID)

Updates a Purchase Order in Optomate Touch based on the specified ID.

Input

Name	Type : Default	Null
PURCHASE_ORDER_STATUS	String (1)	<input checked="" type="checkbox"/>

Validation

The API will validate the following on Post

Values for all properties that cannot be Null are supplied

Supplied value for IDENTIFIER does not already exist in Optomate Touch

At least one ITEM is included in the Purchase Order
Supplied values for SUPPLIER_IDENTIFIER, BRANCH_IDENTIFIER and ITEMS. STOCK_TYPE_ID exist in Optomate Touch
Supplied values for ITEMS.STOCK_ITEM_ID exist in Optomate Touch for the related stock types and supplier
Supplied values for ITEMS.QTY are positive values
Supplied values for ITEMS.LIST_PRICEEX and ITEMS.DISCOUNT_PERCENT are not negative values

The API will validate the following on Patch

Supplied value for PURCHASE_ORDER_STATUS (PurchaseOrderStatuses) is valid Static Reference value
--

RECALL TYPES

GET RecallTypes(ID)

Gets a single active Recall Type based on the specified ID.

Output

Recall Type record.

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
IDENTIFIER	String (20)	<input checked="" type="checkbox"/>
DESCRIPTION	String (4000)	<input checked="" type="checkbox"/>
NO_MONTHS	Int32	<input checked="" type="checkbox"/>

GET RecallTypes

Gets all active Recall Types in Optomate Touch.

Output

Collection of Recall Type records

RECEIPT SUMMARY

GET ReceiptSummary?dateFrom=<val>&dateTo=<val>

Gets Receipt Summary records based on Receipts that were issued on or after dateFrom and on or before dateTo.

Query Parameters

Name	Type	Null
dateFrom	Date <i>yyyy-MM-dd</i>	<input checked="" type="checkbox"/>
dateTo	Date <i>yyyy-MM-dd</i>	<input checked="" type="checkbox"/>

Output

Name	Type	Null
PAYMENT_TYPE	String (3) <i>Ref Code PaymentTypes</i>	<input checked="" type="checkbox"/>
COUNT	Int32	<input checked="" type="checkbox"/>

AMOUNT_INC_GST	Decimal	<input checked="" type="checkbox"/>
AMOUNT_EX_GST	Decimal	<input checked="" type="checkbox"/>

REGIONS

GET Regions(ID)

Gets a single Region based on the specified ID.

Output

Region record.

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
IDENTIFIER	String (10)	<input checked="" type="checkbox"/>
DESCRIPTION	String (60)	<input checked="" type="checkbox"/>

GET Regions

Gets all Regions in Optomate Touch.

OUTPUT

Collection of Region records.

SALES SUMMARY

GET SalesSummary?dateFrom=<val>&dateTo=<val>

Gets Sales Summary records based on Invoices that were issued on or after dateFrom and on or before dateTo.

Query Parameters

Name	Type	Null
dateFrom	Date <i>yyyy-MM-dd</i>	<input checked="" type="checkbox"/>
dateTo	Date <i>yyyy-MM-dd</i>	<input checked="" type="checkbox"/>

Output

Name	Type	Null
STOCK_TYPE	Int32 <i>Ref Id StockTypes</i>	<input checked="" type="checkbox"/>
QTY	Int32	<input checked="" type="checkbox"/>
AMOUNT_INC_GST	Decimal	<input checked="" type="checkbox"/>
AMOUNT_EX_GST	Decimal	<input checked="" type="checkbox"/>

SMS TRANSACTIONS

GET SmsTransactions(ID)

Gets a single SMS Transaction based on the specified ID.

Output

SMS Transaction record.

Name	Type	Null
ID	Int64	<input type="checkbox"/>
DATE_ADDED	DateTimeOffset <i>yyyy-MM-ddTHH:mm:ss.fffzzz</i>	<input type="checkbox"/>

PATCH Solution(ID)

Same as Put except only the updated properties need to be supplied.

Validation

The API will validate the following on Post, Put or Patch

Values for all properties that cannot be Null are supplied
Supplied value for BARCODE is a unique value that does not already exist in Optomate Touch for all stock items
Supplied values for CATEGORY_IDENTIFIER, SUPPLIER_IDENTIFIER, INSTITUTION_IDENTIFIER and BRANCH_INFO.BRANCH_IDENTIFIER exist in Optomate Touch

SOURCES

GET Sources(ID)

Gets a single Source based on the specified ID.

Output

Source record.

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
NAME	String (200)	<input checked="" type="checkbox"/>

GET Sources

Gets all Sources in Optomate Touch.

Output

Collection of Source records.

SPECTACLE FRAMES

GET SpectacleFrames(ID)

Gets a single Spectacle Frame based on the specified ID.

Output

Spectacle Frame record.

PATCH SpectacleLens(ID)

Same as Put except only the updated properties need to be supplied.

Validation

The API will validate the following on Post, Put or Patch

Values for all properties that cannot be Null are supplied

Value for ADDONS_INPUT.ID is supplied when ADDONS_INPUT.OPERATION is 'U' or 'D'

Value for ADDONS_INPUT.SPECLENS_ADDON_DESCRIPTION_ID is supplied when ADDONS_INPUT.OPERATION is 'C'

Supplied values for CATEGORY_IDENTIFIER, SUPPLIER_IDENTIFIER, INSTITUTION_IDENTIFIER, BRANCH_INFO.BRANCH_IDENTIFIER, ADDONS_INPUT.ID and ADDONS_INPUT.SPECLENS_ADDON_DESCRIPTION_ID exist in Optomate Touch

Supplied values for STOCKGRIND (Spectacle Lens StockGrind), MATERIAL (Spectacle Lens Materials), LENSTYPE (Spectacle Lens Types), OPTILINKGROUP (Optilink Lens Groups) and ADDONS_INPUT.OPERATION (Resource Operations - only 'C' for Post) are valid Static Reference values

SPECTACLE LENS ADDONS

GET SpectacleLensAddons(ID)

Gets a single Spectacle Lens Addon based on the specified ID.

Output

Spectacle Lens Addon record.

PATCH SpectacleLensAddon(ID)

Same as Put except only the updated properties need to be supplied.

Validation

The API will validate the following on Post, Put or PATCH

Values for all properties that cannot be Null are supplied
Supplied value for BARCODE is a unique value that does not already exist in Optomate Touch for all stock items
Supplied values for CATEGORY_IDENTIFIER, SUPPLIER_IDENTIFIER, INSTITUTION_IDENTIFIER and BRANCH_INFO.BRANCH_IDENTIFIER exist in Optomate Touch
Supplied values for VISUSTORE_COATING_TYPE ('COLOR', 'UV', 'ANTIREFLEX', 'HARD', 'CLEAN') are valid values

SPECTACLE LENS ADDONS DESCRIPTIONS

GET SpectacleLensAddonsDescriptions(ID)

Gets a single Spectacle Lens Addons Description record based on the specified ID.

Output

Spectacle Lens Addons Description record.

Name	Type	Null
ID	Int64	<input type="checkbox"/>
SINGLE_HEALTH_FUND	String (3)	<input type="checkbox"/>
MULTI_HEALTH_FUND	String (3)	<input type="checkbox"/>
DESCRIPTION	String (200)	<input type="checkbox"/>

GET SpectacleLensAddonsDescriptions

Gets all Spectacle Lens Addons Descriptions records in Optomate Touch.

OUTPUT

Collection of Spectacle Lens Addons Descriptions records.

SPECTACLE LENS ORDERS

Has Read Conditions, see Security->Authorization->Read Conditions.

GET SpectacleLensOrders(ID)

Gets a single Spectacle Lens Order based on the specified ID.

Output

Spectacle Lens Order record.

RIGHT_FITTING_HEIGHT	Double	<input checked="" type="checkbox"/>
LEFT_FITTING_HEIGHT	Double	<input checked="" type="checkbox"/>

Validation

The API will validate the following on Post

Values for all properties that cannot be Null are supplied
RXDATE is a past date no older than 2 years
At least one of LEFT_LENS_BARCODE, RIGHT_LENS_BARCODE and SPECFRAME_BARCODE is supplied
Supplied values for PATIENT_ID, BRANCH_IDENTIFIER, DELIVERY_BRANCH, SUPPLIER_IDENTIFIER, LEFT_LENS_BARCODE, RIGHT_LENS_BARCODE, SPECFRAME_BARCODE, SPECLENS_TINT_BARCODE and ADDONS_INPUT.SPECLENS_ADDON_ID exist in Optomate Touch
Supplied values for WHEN_READY (When Ready Notification Types), WARRANTY (Warranty Types), LEFT_DAB, RIGHT_DAB (Both Spectacle Lens Dab), LITERALITY, DOMINANT_EYE (Eye Selections), TINT_LAB_INHOUSE (Spectacle Lens Lab/Inhouse), TINT_GRAD_UNIFORM (Spectacle Lens Tint Types), LEFT_LENSTYPE, RIGHT_LENSTYPE (Spectacle Lens Order Types), LEFT_STOCKGRIND, RIGHT_STOCKGRIND (Spectacle Lens Stock Grind), LEFT_FITORUNCUT, RIGHT_FITORUNCUT (Spectacle Lens Fit/Uncut), LEFT_HPRISM_TYPE, RIGHT_HPRISM_TYPE (H Prism Types), LEFT_VPRISM_TYPE and RIGHT_VPRISM_TYPE (V Prism Types) are valid Static Reference values
Supplied value for DISPENSER_IDENTIFIER is an active Optometrist or Dispenser in Optomate Touch

The API will validate the following on Patch

Value for CANCELLED_REASON_ID is supplied if CANCELLED is set to TRUE
Supplied value for CANCELLED_REASON_ID exists in Optomate Touch

SPECTACLE LENS RXS

GET SpectacleLensRxs(ID)

Gets a single Spectacle Lens Rx based on the specified ID.

Output

Spectacle Lens Rx record.

PATCH SpectacleLensRx (ID)

Updates a Spectacle Lens Rx in Optomate Touch based on the specified ID. If RIGHT_EYE_ONLY is set to true, LEFT_PD and LEFT_NEARPD will not be updated. Conversely if LEFT_EYE_ONLY is set to true, RIGHT_PD and RIGHT_NEARPD will not be updated.

Input

Name	Type : Default	Null
RIGHT_PD	String (10)	<input checked="" type="checkbox"/>
LEFT_PD	String (10)	<input checked="" type="checkbox"/>
RIGHT_NEARPD	String (10)	<input checked="" type="checkbox"/>
LEFT_NEARPD	String (10)	<input checked="" type="checkbox"/>

Validation

The API will validate the following on Post

Values for all properties that cannot be Null are supplied
EXPIRY_DATE cannot be older than RXDATE
Supplied values for PATIENT_ID, OPTOMETRIST_ID, BRANCH_IDENTIFIER, LEFT_LENS_BARCODE, RIGHT_LENS_BARCODE and LEFT_TINT_IDENTIFIER exist in Optomate Touch
Supplied values for LEFT_HPRISM_TYPE, RIGHT_HPRISM_TYPE (H Prism Types) and LEFT_VPRISM_TYPE, RIGHT_VPRISM_TYPE (V Prism Types) are valid Static Reference values
RIGHT_EYE_ONLY and LEFT_EYE_ONLY cannot both be TRUE

SPECTACLE LENS TINTS

GET SpectacleLensTints(ID)

Gets a single Spectacle Lens Tint based on the specified ID.

Output

Spectacle Lens Tint record.

FAVOURITE	Boolean : false	<input checked="" type="checkbox"/>

PATCH SpectacleLensTint(ID)

Same as Put except only the USER and the updated properties need to be supplied.

Validation

The API will validate the following on Post, Put or Patch

Values for all properties that cannot be Null are supplied
Supplied value for BARCODE is a unique value that does not already exist in Optomate Touch for all stock items
Supplied values for CATEGORY_IDENTIFIER, SUPPLIER_IDENTIFIER, INSTITUTION_IDENTIFIER and BRANCH_INFO.BRANCH_IDENTIFIER exist in Optomate Touch
Supplied values for TYPE (Spectacle Lens Tint Types) are valid Static Reference values

STATIC REFERENCE

GET StaticReference

Gets a single record showing basic API information.

Output

Static Reference record.

Name	Format	Null
NAME	String (20)	<input checked="" type="checkbox"/>
PUBLISHER	String (25)	<input checked="" type="checkbox"/>
MIN_OT_VERSION	String (25)	<input checked="" type="checkbox"/>
API_VERSION	String (10)	<input checked="" type="checkbox"/>
OT_VERSION	String (25)	<input checked="" type="checkbox"/>

STATIC REFERENCE CODE

GET StaticReferenceCode(CODE)/<Resource>

Gets a single record for the requested resource based on the specified CODE.

Resources

GET Sunglasses

Gets all Sunglasses from Optomate Touch.

Output

A Collection of Sunglasses records.

POST Sunglass

Creates a Sunglasses record in Optomate Touch. The supplied values for BRANCH_INFO will be used to create the related data for each Branch.

Input

Name	Type : Default	Null
BARCODE	String (20)	<input type="checkbox"/>
HEALTH_FUND	String (5)	<input checked="" type="checkbox"/>
MODEL	String (20)	<input checked="" type="checkbox"/>
COLOUR_CODE	String (15)	<input checked="" type="checkbox"/>
COLOUR_DESCRIPTION	String (70)	<input checked="" type="checkbox"/>
SIZE	Double : 0	<input checked="" type="checkbox"/>
DESCRIPTION	String (100)	<input type="checkbox"/>
DEPTH	Double : 0	<input checked="" type="checkbox"/>
DIAG	Double : 0	<input checked="" type="checkbox"/>
TEMPLE	Double : 0	<input checked="" type="checkbox"/>
NOTES	String (4000)	<input checked="" type="checkbox"/>
SUPPLIER_STOCK_CODE	String (50)	<input checked="" type="checkbox"/>

PATCH Sunglass(ID)

Same as Put except only the updated properties need to be supplied.

Validation

The API will validate the following on Post, Put or Patch

Values for all properties that cannot be Null are supplied
Supplied value for BARCODE is a unique value that does not already exist in Optomate Touch for all stock items
Supplied values for CATEGORY_IDENTIFIER, SUPPLIER_IDENTIFIER, MATERIAL_IDENTIFIER, CONSTRUCTION_IDENTIFIER, BRAND_IDENTIFIER, INSTITUTION_IDENTIFIER and BRANCH_INFO.BRANCH_IDENTIFIER exist in Optomate Touch
Supplied values for GENDER (Stock Item Gender), STATUS (Stock Item Statuses) and UVRATING (Sunglasses Uv Rating) are valid Static Reference values

SUPPLIERS

GET Suppliers(ID)

Gets a single Supplier based on the specified ID.

Output

Supplier record.

Name	Type	Null
ID	Int64	<input checked="" type="checkbox"/>
DATE_ADDED	DateTimeOffset yyyy-MM-ddTHH:mm:ss.fffzzz	<input checked="" type="checkbox"/>

TELEPHONE1	String (15)	<input checked="" type="checkbox"/>
TELEPHONE2	String (15)	<input checked="" type="checkbox"/>
FAX	String (15)	<input checked="" type="checkbox"/>
GENERAL_EMAIL	String (100)	<input checked="" type="checkbox"/>
ORDER_EMAIL	String (100)	<input checked="" type="checkbox"/>
ABN	String (15)	<input checked="" type="checkbox"/>
GENERAL_WEB	String (300)	<input checked="" type="checkbox"/>
ORDER_WEB	String (300)	<input checked="" type="checkbox"/>

PATCH Supplier(ID)

Same as Put except only the updated properties need to be supplied.

Validation

The API will validate the following on Post, Put or Patch

Values for all properties that cannot be Null are supplied
--

For Post, supplied value for IDENTIFIER does not already exist in Optomate Touch
--

For Post, supplied value for IDENTIFIER is not more than 10 characters
--

SUPPLIER REPS

GET SupplierReps(ID)

Gets a single Supplier Rep based on the specified ID.

Output

Supplier Rep record.

Name	Type	Null
ID	Int64	<input type="checkbox"/>
DATE_ADDED	DateTimeOffset <i>yyyy-MM-ddTHH:mm:ss.fffzzz</i>	<input type="checkbox"/>
USER_ADDED	String (20)	<input type="checkbox"/>
DATE_EDITED	DateTimeOffset <i>yyyy-MM-ddTHH:mm:ss.fffzzz</i>	<input checked="" type="checkbox"/>
USER_EDITED	String (20)	<input checked="" type="checkbox"/>
FIRST_NAME	String (30)	<input type="checkbox"/>
SURNAME	String (30)	<input checked="" type="checkbox"/>
PHONE	String (30)	<input checked="" type="checkbox"/>
EMAIL	String (100)	<input checked="" type="checkbox"/>
RATING	Int32 (0-10)	<input checked="" type="checkbox"/>
SUPPLIER_ID	Int64	<input checked="" type="checkbox"/>

GET SupplierReps(ID)/Supplier

Gets a single Supplier record related to the Supplier Rep based on the specified ID.

Output

Supplier record.

GET SupplierReps

Gets all Supplier Reps in Optomate Touch.

Output

A Collection of Supplier Rep records.

POST SupplierRep

Creates a Supplier Rep in Optomate Touch.

Input

Name	Type	Null
FIRST_NAME	String (30)	<input type="checkbox"/>
SURNAME	String (30)	<input checked="" type="checkbox"/>
PHONE	String (30)	<input checked="" type="checkbox"/>
EMAIL	String (100)	<input checked="" type="checkbox"/>
RATING	Int32 (0-10)	<input checked="" type="checkbox"/>
SUPPLIER_ID	Int64	<input type="checkbox"/>

PUT SupplierRep(ID)

Updates a Supplier Rep in Optomate Touch based on the specified ID.

Input

Name	Type	Null
FIRST_NAME	String (30)	<input type="checkbox"/>
SURNAME	String (30)	<input checked="" type="checkbox"/>
PHONE	String (30)	<input checked="" type="checkbox"/>
EMAIL	String (100)	<input checked="" type="checkbox"/>
RATING	Int32 (0-10)	<input checked="" type="checkbox"/>

PATCH SupplierRep(ID)

Same as Put except only the updated properties need to be supplied.

Validation

The API will validate the following on Post, Put or Patch

Values for all properties that cannot be Null are supplied
For Post, the supplied value for SUPPLIER_ID exists in Optomate Touch
Supplied value for RATING is between 0-10

USERS

GET Users(ID)

Gets a single User based on the specified ID.

Output

User record.

Name	Type	Null
ID	Int64	<input type="checkbox"/>
DATE_ADDED	DateTimeOffset yyyy-MM-ddTHH:mm:ss.fffzzz	<input type="checkbox"/>
USER_ADDED	String (20)	<input type="checkbox"/>
DATE_EDITED	DateTimeOffset yyyy-MM-ddTHH:mm:ss.fffzzz	<input checked="" type="checkbox"/>
USER_EDITED	String (20)	<input checked="" type="checkbox"/>
IDENTIFIER	String (10)	<input type="checkbox"/>
GIVEN_NAME	String (100)	<input type="checkbox"/>
SURNAME	String (200)	<input type="checkbox"/>
INACTIVE	Boolean	<input type="checkbox"/>
USER_TYPE	Int32	<input type="checkbox"/>
IS_ADMINISTRATOR	Boolean	<input type="checkbox"/>
USERNAME	String (50)	<input type="checkbox"/>
EMAIL_ADDRESS	String (200)	<input checked="" type="checkbox"/>
USE_APPBOOK	Boolean	<input type="checkbox"/>
IS_ROAMING_USER	Boolean	<input type="checkbox"/>
EXTERNAL_USER_ID	String (40)	<input checked="" type="checkbox"/>

GET Users

Gets all Users in Optomate Touch.

Output

A Collection of User records.

POST User

Creates a User in Optomate Touch.

Input

Name	Type : Default	Null
IDENTIFIER	String (10)	<input type="checkbox"/>
GIVEN_NAME	String (100)	<input type="checkbox"/>
SURNAME	String (200)	<input type="checkbox"/>
INACTIVE	Boolean : false	<input checked="" type="checkbox"/>
USER_TYPE	Int32	<input type="checkbox"/>
IS_ADMINISTRATOR	Boolean : false	<input checked="" type="checkbox"/>
USERNAME	String (50)	<input type="checkbox"/>
PASSWORD	String (100)	<input type="checkbox"/>
EMAIL_ADDRESS	String (200)	<input checked="" type="checkbox"/>
USE_APPBOOK	Boolean : false	<input checked="" type="checkbox"/>
IS_ROAMING_USER	Boolean : false	<input checked="" type="checkbox"/>
EXTERNAL_USER_ID	String (40)	<input checked="" type="checkbox"/>

PATCH User(ID)

Updates a User in Optomate Touch based on the specified ID.

Input

Name	Type	Null
GIVEN_NAME	String (100)	<input type="checkbox"/>
SURNAME	String (200)	<input type="checkbox"/>
INACTIVE	Boolean	<input checked="" type="checkbox"/>
USER_TYPE	Int32	<input type="checkbox"/>
IS_ADMINISTRATOR	Boolean	<input checked="" type="checkbox"/>
PASSWORD	String (100)	<input checked="" type="checkbox"/>
EMAIL_ADDRESS	String (200)	<input checked="" type="checkbox"/>
USE_APPBOOK	Boolean	<input checked="" type="checkbox"/>
IS_ROAMING_USER	Boolean	<input checked="" type="checkbox"/>
EXTERNAL_USER_ID	String (40)	<input checked="" type="checkbox"/>

Validation

The API will validate the following on Post or Patch

Values for all properties that cannot be Null are supplied
--

For Post, the supplied value for IDENTIFIER and USERNAME do not exist in Optomate Touch

Supplied values for USER_TYPE (User Types) are valid Static Reference Id values

VOUCHER TYPES

GET VoucherTypes(ID)

Gets a single Voucher Type based on the specified ID.

Output

Frame Material record.

Name	Type	Null
ID	Int64	<input type="checkbox"/>
VOUCHER_TYPE	String (100)	<input type="checkbox"/>
AMOUNT	Decimal	<input type="checkbox"/>
EXPIRY_DATE	Date <i>yyyy-MM-dd</i>	<input checked="" type="checkbox"/>

GET VoucherTypes

Gets all Voucher Types in Optomate Touch.

OUTPUT

Collection of Voucher Type records.

APPENDICES

APPENDIX A: ODATA QUERY EXAMPLES

The “\$filter” query option would be the most useful query option that allows for selecting of sub-collections of resources based on a set of criteria.

For example, for Patients a filter with the DATE_EDITED field can be applied to get a collection of patients that have been updated in a particular date range:

```
GET /Patients?$filter=DATE_EDITED gt 2018-09-08 and DATE_EDITED lt 2019-01-01
```

A filter predicate can be applied on any of the fields that are returned by the resource request. So for patients a search by gender and state can be performed by supplying the following \$filter query option:

```
GET /Patients?$filter=GENDER eq 'F' and RESIDENT_STATE eq 'WA'
```

Another useful OData query option is “\$select” to select the fields that you would like returned in the request instead of the whole resource model, so adding on the previous example:

```
GET /Patients?$filter=GENDER eq 'F' and RESIDENT_STATE eq 'WA'&$select=TITLE, GIVEN, SURNAME, BIRTHDATE
```

“\$orderby” will order the records by the specified field(s)

```
GET /Patients?$filter=GENDER eq 'F' and RESIDENT_STATE eq 'WA'&$select=TITLE, GIVEN, SURNAME, BIRTHDATE&$orderby=SURNAME desc, GIVEN
```

Any resource property of type record or Collection can be retrieved by using the OData **\$expand** query option.

```
GET /PurchaseOrders?$expand=ITEMS($select=STOCK_ITEM_ID,STOCK_TYPE_ID,QTY)
```

A count of resources in the returned results can be achieved by using the “\$count” query option:

```
GET /Patients?$filter=GENDER eq 'F' and RESIDENT_STATE eq 'WA'&$count=true
```

“\$apply” can be used for grouping of results:

```
GET /Patients?$apply=groupby((GENDER),aggregate(ID with countdistinct as Total))
```

APPENDIX B: EXAMINATION DETAIL

APPENDIX F: MONKEY SOFTWARE CUSTOM SEARCH

The Custom Search allows for a search parameter definition to be passed into the POST request to perform a custom search on an OptomateTouchAPI resource. The Search parameter can contain either AND or OR predicates. Each AND predicate can be a comparison of a String, Double or Date property or it can be a collection of child OR predicates. Each OR predicate can be a comparison of a String, Double or Date property or it can be a collection of child AND predicates.

The Custom Search allows for simple and more complex searches to be performed such as:

- property1 equals "Val1" AND property2 equals "Val2"
- property1 in {"Val1", "Val2", Val3"}
- property1 equals "Val1" AND property2 equals "Val2" AND (property3 equals "Val3" OR property4 equals "Val4")
- property1 equals "Val1" OR property2 contains "Val2" OR (property3 equals "Val3" AND property4 equals "Val4")

Input

Name	Type	Null
Search	Record (Search Parameter)	<input checked="" type="checkbox"/>

SEARCH PARAMETER

The Search Parameter must contain either an And construct or an Or construct. If both a supplied the And will take precedence.

Name	Type	Null
And	Collection (And Predicate)	<input checked="" type="checkbox"/>
Or	Collection (Or Predicate)	<input checked="" type="checkbox"/>

AND PREDICATE

The And predicate adds a search filter with an AND operator to the custom search query with the following conditions

- it must contain at least on search predicate or a collection of Or predicates
- when a search predicate is specified the property name must be supplied
- if multiple search predicates are specified only the first predicate will be applied in order of precedence as specified in the following table:

Name	Type	Null
PropertyName	String	<input checked="" type="checkbox"/>
StringPredicate	Record (String Predicate)	<input checked="" type="checkbox"/>
DoublePredicate	Record (Double Predicate)	<input checked="" type="checkbox"/>
DatePredicate	Record (Date Predicate)	<input checked="" type="checkbox"/>
Or	Collection (child Or Predicate)	<input checked="" type="checkbox"/>

OR PREDICATE

The Or predicate adds a search filter with an OR operator to the custom search query with the following conditions

- it must contain at least one search predicate or a collection of And predicates
- when a search predicate is specified the property name must be supplied
- if multiple search predicates are specified only the first predicate will be applied in order of precedence as specified in the following table:

Name	Type	Null
PropertyName	String	<input checked="" type="checkbox"/>
StringPredicate	Record (String Predicate)	<input checked="" type="checkbox"/>
DoublePredicate	Record (Double Predicate)	<input checked="" type="checkbox"/>
DatePredicate	Record (Date Predicate)	<input checked="" type="checkbox"/>
And	Collection (child And Predicate)	<input checked="" type="checkbox"/>

The child Or/And predicates do not have child And/Or predicates themselves.

STRING PREDICATE

The String predicate adds a search filter with a string value and at least one comparison property must be specified. If multiple comparison properties are specified only the first property will be applied in order of precedence as specified in the following table.

Name	Type	Null
EqualsVal	String	<input checked="" type="checkbox"/>
ContainsVal	String	<input checked="" type="checkbox"/>
InVals	Collection (String)	<input checked="" type="checkbox"/>

DOUBLE PREDICATE

The Double predicate adds a search filter with a double value and at least one comparison property must be specified. If multiple comparison properties are specified only the first property will be applied in order of precedence as specified in the following table.

Name	Type	Null
EqualsVal	String	<input checked="" type="checkbox"/>
InVals	Collection (Double)	<input checked="" type="checkbox"/>

DATE PREDICATE

The Date predicate adds a search filter with a date value and at least one comparison property must be specified. If multiple comparison properties are specified only the first property will be applied in order of precedence as specified in the following table, the exception being that the GreaterOrEqual and LessOrEqual can be applied at the same time.

Name	Type	Null
EqualsVal	Date	<input checked="" type="checkbox"/>
GreaterOrEqualVal	Date	<input checked="" type="checkbox"/>
LessOrEqualVal	Date	<input checked="" type="checkbox"/>

Examples

To search for patients born between 2 dates
(BIRTHDATE ge '1976-01-01' and BIRTHDATE le '2000-01-01')

```
{
  "Search": {
    "And": [{
      "PropertyName": "BIRTHDATE",
      "DatePredicate": { "GreaterOrEqualVal": "1976-01-01" }
    },
    {
      "PropertyName": "BIRTHDATE",
      "DatePredicate": { "LessOrEqualVal": "2000-01-01" }
    }
  ]
}
```

To search for patients with first name "James" or last name "Budny"
(GIVEN eq 'James' or SURNAME eq 'Budny')

```
{
  "Search": {
    "Or": [{
      "PropertyName": "GIVEN",
      "StringPredicate": { "EqualsVal": "James" }
    },
    {
      "PropertyName": "SURNAME",
      "StringPredicate": { "EqualsVal": "Budny" }
    }
  ]
}
```

To search for patients with first name "James" and last name in {"Budny", "Franco"}
(GIVEN eq 'James' and SURNAME in ('Budny', 'Franco'))

```
{
  "Search": {
    "And": [{
      "PropertyName": "GIVEN",
      "StringPredicate": { "EqualsVal": "James" }
    },
    {
      "PropertyName": "SURNAME",
      "StringPredicate": { "InVals": ["Budny", "Franco"] }
    }
  ]
}
```

```

    }
  }
}

```

To search for patients with first name “James” and (last name “Franco” or reference “42”) (GIVEN eq ‘James’ and (SURNAME eq ‘Franco’ or REFERENCE eq ‘42’)

```

{
  "Search": {
    "And": [{
      "PropertyName": "GIVEN",
      "StringPredicate": { "EqualsVal": "James" }
    },
    {
      "Or": [
        {
          "PropertyName": "SURNAME",
          "StringPredicate": { "EqualsVal": "Franco" }
        },
        {
          "PropertyName": "REFERENCE",
          "StringPredicate": { "EqualsVal": "42" }
        }
      ]
    }
  ]
}
}

```
